

Dosage Calculation RN Fundamentals Online Practice Assessment 3.0 Questions and Answers 100% Pass

A nurse is preparing to administer codeine 20 mg PO every 6 hr PRN pain. Available is codeine oral solution 10 mg/ 5 mL. How many mL should the nurse administer per dose?

(Round to the nearest whole number. Use a leading zero if it applies. Do not use a trailing zero.)

✓✓ Answer: 10 mL

Follow these steps for the Ratio and Proportion method of calculation:

Step 1: What is the unit of measurement the nurse should calculate? mL

Step 2: What is the dose the nurse should administer? Dose to administer = Desired 20 mg

Step 3: What is the dose available? Dose available = Have 10 mg

Step 4: Should the nurse convert the units of measurement? No

Step 5: What is the quantity of the dose available? 5 mL

Step 6: Set up an equation and solve for X.

Have/Quantity = Desired/X

10 mg/ 5 mL = 20 mg/ X mL

X mL = 10 mL

Dosage Calculations Made Incredibly Easy! Kimberly Giddings,2024-08-19 Designed to help health care professionals who are looking for a simple step by step approach to math calculations Dosage Calculations Made Incredibly Easy 6th edition is a

fully illustrated guide that offers the complete how to on calculating dosages for all drug forms and administration routes

Medical Dosage Calculations June Looby Olsen, Anthony Patrick Giangrosso, Dolores M. Shrimpton, 2004 The eight edition of Medical Dosage Calculations will continue to be a friendly workbook approach using dimensional analysis This has become the primary dosage calculation technique among nursing and allied health students Dosage Calculations for Nursing Students Nurse Academy, 2021-01-06 This is the official textbook on dosage calculations for nursing students created by Nurse Academy Looking for the best dosage calculation book on Amazon Look no further For those struggling with basic and more complex nursing calculations this is an essential text This book represents a significant change in Nursing Practices with chapters being rearranged and consolidated It is also designed to help nursing students to practice the math relevant to administering drugs in the normal course of a drug round As much as it is not designed to be difficult it will make students think The list of decimals fractions and percentages given in the book are something you must learn Most nurses and practitioners have already covered this at school The book has employed the CASE approach which is a step by step method for performing dosage calculations drawn by the author from extensive experience across the continuum of care to bring a truly informative and dynamic resource to the readers The book is presented in an order which follows a logical and sequential tract Examples are offered and each chapter is interspersed with exercises for the reader to test their understanding The review of Basic Calculations has been well revised with more explanations and elaborations included in the worked examples The three methods of dosage calculation are presented side by side in table format for every dosage calculation updated chapter references updated content for dosing and safe injection practices per CDC Guidelines and the Joint Commission New information on heparin dosage protocol to reflect clinical environment practices has also been included The chapters are devoted to the review of basic calculations dosages of oral medications drug doses for injection intravenous infusion and pediatric doses This is a very useful book for nursing students who often wrestle with the complexities and nuances of drug calculation and administration It works well as either a reference or as a read through I would not recommend reading this book in one sitting otherwise numbers facts and figures will begin to blur into one Throughout the book drug dosages have been revised and updated It must be noted that the aim of Nursing Calculations is to teach relevant skills in arithmetic and this book is not meant to be used as a pharmacology reference We look forward to your feedback Nurse Academy
