Passage (click here to show all)

1. Water droplets pattered onto the gold and brown leaves that covered the forest floor. The last shreds of cloud glided away toward the low hills, and the moon beamed down in their wake. The rain stopped just in time for the porcupine's nightly foraging to begin.

2. The dark brown, chunky figure climbed down the tree trunk and shuffled over the soggy leaf carpet. Her search for tasty vegetation that might linger in sheltered spots turned up meager pickings, however. There had already been several nights of hard frost so the animal spent more time traveling than eating. Before the night was half over, she'd wandered out of her usual territory and into a clearing where a rustic cottage overlooked a lake.

Question 11

"Reflected moonlight from the rippled surface of the lake knifed through slits in the dock"

Which statement best explains the meaning of the sentence above?

☐ A. Water was wearing away at the dock like a sharp tool

☐ B. Moonlight revealed a knife that had fallen into the lake

☐ C. Narrow rays of moonlight shone up between the boards of the dock

☐ D. Moonlight reflected off the water like light glancing off a sharp knife

Dubeck,Yasmin Sitabkhan,Christopher Cummiskey,Devanshi Unadkat,2023-05-15 This paper contains a new analysis of gender differences in early grade reading and mathematics outcomes in 19 USAID funded studies over the past decade from 14 locations in Africa Asia Latin America and the Middle East The paper addresses gaps in the literature related to learning patterns for girls and boys in lower and middle income countries and in early primary school We analyzed the results from reading and mathematics assessments in grades 2 and 3

including differences in oral reading fluency ORF and quantitative comparison scores between boys and girls as well as differences in score distributions by gender In line with results from assessments in upper grades and in wealthier countries we found that girls consistently outperformed boys in reading In mathematics boys slightly outperformed girls although the differences were typically not large Global experience has shown that patterns in poor performance become more entrenched the further learners progress through the grades suggesting that early interventions for boys in reading and girls in mathematics could have long term benefits At the same time both girls and boys typically score below expectations in the two subjects across countries necessitating targeted strategies to improve outcomes for both genders early in their educational trajectories
