The OIC, the UN, and Counter-Terrorism Law-Making Katja Samuel, 2014-07-18 The increasingly transnational nature of terrorist activities compels the international community to strengthen the legal framework in which counter terrorism activities should occur at every level including that of intergovernmental organizations This unique timely and carefully researched monograph examines one such important yet generally under researched and poorly understood intergovernmental organization the Organization of Islamic Cooperation OIC formerly the Organization of the Islamic Conference In particular it analyses in depth its institutional counter terrorism law making practice and the relationship between resultant OIC law and comparable UN norms in furtherance of UN Global Counter Terrorism Strategy goals Furthermore it explores two common mis assumptions regarding the OIC namely whether its internal institutional weaknesses mean that its law making practice is inconsequential at the intergovernmental level and whether its self declared Islamic objectives and nature are irrelevant to its institutional practice or are instead reflected within OIC law Where significant normative tensions are discerned between OIC law and UN law the monograph explores not only whether these may be explicable at least in part by the OIC s Islamic nature and objectives but also whether their corresponding institutional legal orders are conflicting or cooperative in nature and the resultant implications of these findings for international counter terrorism law and policy making This monograph is expected to appeal especially to national and intergovernmental counter terrorism practitioners and policy makers as well as to scholars concerned with the interaction between international and Islamic law norms From the Foreword by Professor Ben Saul The University of Sydney Dr Samuels book must be commended as an original and insightful contribution to international legal scholarship on the OIC Islamic law international law and counter terrorism It fills significant gaps in legal knowledge about the vast investment of international and regional effort that has gone into the global counter terrorism enterprise over many decades and which accelerated markedly after 9 11 The scope of the book is ambitious its subject matter is complex and its sources are many and diverse Dr Samuel has deployed an appropriate theoretical and empirical methodology harnessed an intricate knowledge of the field and brought a balanced judgement to bear to bring these issues to life **Dealerscope Consumer Electronics Marketplace**

Women, Islam and International Law Ekaterina Yahyaoui Krivenko, 2009 Islam and women's human rights entertain an uneasy relationship Much has been written on the subject This volume addresses it from a new perspective It attempts to define some basis for constructive dialogue and interaction in the context of international law and more precisely in the context of participation of many Muslim States in the United Nations Convention on the Elimination of All Forms of Discrimination Against Women Having discovered a constructive potential in both Islam and women's human rights the author concentrates on the role which international law should play in promoting dialogue and constructive interaction This is done mainly through analysis of the regime of reservations and of the practice of

reservations developed in the context of Muslim Statesa TM participation in the CEDAW The basic thesis defended is the following Islam as articulated in the practice of States and womena TM s human rights as reflected in international instruments are both results of human activity Their analysis in this study reveals more commonalities than one might expect International law should be more attentive to their voices and more innovative in using these commonalities in order to promote constructive dialogue between them and thus help to improve the situation of women suffering from discrimination and inequalities West Coast Review of Books ,1985
