Solutions for End-of-Chapter Questions and Problems: Chapter Two

1. What are the differences between community banks, regional banks, and money-center banks? Contrast the business activities, location, and markets of each of these bank groups.

Community banks typically have assets under \$1 billion and serve consumer and small business customers in local markets. In 2012, 91.5 percent of the banks in the United States were classified as community banks. However, these banks held only 9.0 percent of the assets of the banking industry. In comparison with regional and money-center banks, community banks typically hold a larger percentage of assets in consumer and real estate loans and a smaller percentage of assets in commercial and industrial loans. These banks also rely more heavily on local deposits and less heavily on borrowed and international funds.

Regional banks range in size from several billion dollars to several hundred billion dollars in assets. The banks normally are headquartered in larger regional cities and often have offices and branches in locations throughout large portions of the United States. Although these banks provide lending products to large corporate customers, many of the regional banks have developed sophisticated electronic and branching services to consumer and residential customers. Regional banks utilize retail deposit bases for funding, but also develop relationships with large corporate customers and international money centers.

Money center banks rely heavily on nondeposit or borrowed sources of funds. Some of these banks have no retail branch systems and most money center banks are major participants in foreign currency markets. These banks compete with the larger regional banks for large commercial loans and with international banks for international commercial loans. Most money center banks have headquarters in New York City.

2. Use the data in Table 2-5 for banks in the two asset size groups (a) \$100 million-\$1 billion and (b) more than \$10 billion to answer the following questions.
 - a. Why have the ratios for ROA and ROE tended to increase for both groups over the 1990-2006 period, decrease in 2007-2009, and increase in 2010-2012? Identify and discuss the primary variables that affect ROA and ROE as they relate to these two size groups.

banking financial technology and financial services this book also includes business cases in financial services

The REGTECH Book Janos Barberis, Douglas W. Arner, Ross P. Buckley, 2019-08-06 The Regulatory Technology Handbook The transformational potential of RegTech has been confirmed in recent years with US 1.2 billion invested in start ups 2017 and an expected additional spending of US 100 billion by 2020 Regulatory technology will not only provide efficiency gains for compliance and reporting functions it will radically change market structure and supervision This book the first of its kind is providing a comprehensive and invaluable source of information aimed at corporates regulators compliance professionals start ups and policy makers The REGTECH Book brings into a single volume the curated industry expertise delivered by subject matter experts It serves as a single reference point to understand the RegTech eco system and its impact on the industry Readers will learn foundational notions such as The economic impact of digitization and datafication of regulation How new technologies Artificial Intelligence Blockchain are applied to compliance Business use cases of RegTech for cost reduction and new product origination The future regulatory landscape affecting financial institutions technology companies and other industries Edited by world class academics and written by compliance professionals regulators entrepreneurs and business leaders the RegTech Book represents an invaluable resource that paves the way for 21st century regulatory innovation

Behind the Swap Andrew DeJoy, 2022-05-10 Andrew DeJoy's Behind the Swap offers a middle office perspective on the risks and miscommunications in post trade processing and provides a framework and solutions for a better approach In August of 2020 Citibank made one of the worst mistakes in banking history it accidentally sent out almost 900 million of its own funds Many of the recipients didn't give back the money Citibank sued And a federal court ruled that the recipients could keep the funds Citibank's error is not surprising The underlying contributors that led to the mistaken payment permeate the global financial services industry Manual data entry decades old technological infrastructure inadequate training and systems that can't interact with one another are just a few of the problems that face post trade processing the machinery behind financial markets Unfortunately years of neglect by regulators and financial institutions themselves has left this infrastructure needlessly complex astoundingly inefficient frequently inaccurate and woefully inadequate for modern financial markets The problems are easy to see but difficult to admit For financial institutions the current system costs billions of dollars each year in labor systems maintenance and lost funds For regulators the current system precludes the ability to track systemic risk It also artificially inflates the stability of the global financial system For lawyers and prosecutors the current system allows ample opportunity for unlawful misconduct such as rogue trading and fraud Andrew DeJoy's Behind the Swap examines the risks involved in post trade processing in swaps and derivative markets and provides solutions to better control those risks While Andrew doesn't claim to have all the answers he does believe there is a better system that is both achievable and necessary

Non-financial Risk Management in the Financial Industry Norbert Gittfried, Georg Lienke, Florian Seiferlein, Jannik Leiendecker, Bernhard Gehra, Katharina Hefter, Felix

Hildebrand,2025-09-16 Managing compliance operational digital AI and sustainability risks has become increasingly critical for businesses in the financial services industry Furthermore expectations by regulators are ever more demanding while monetary sanctions are being scaled up Accordingly non financial risk NFR management requires sophistication in various aspects of a risk management system This handbook analyses a major success factor necessary for meeting the requirements of modern risk management an institution specific target operating model integrating strategy governance organisation risk management data architecture and cultural elements to ensure maximum effectiveness Fully updated to reflect the latest regulatory and industry developments the second edition features two brand new chapters on the deployment of Gen AI in non financial risk management and cyber resilience in financial institutions The book has been written by senior NFR experts from key markets in Europe the US and Asia It gives practitioners the necessary guidance to master the challenges in today s global risk environment Each chapter covers key regulatory requirements major implementation challenges as well as both practical solutions and examples
