Nordic Narratives of Nature and the Environment Reinhard Hennig, Anna-Karin Jonasson, Peter Degerman, 2020-07-06 Many contemporary environmental risks and global environmental changes occurring today are unprecedented in the history of human life on earth. However, the images and narratives through which humans relate to these phenomena are built on existing cultural tropes and narrative models. Cultural, social, and historical contexts strongly influence how we construct images and narratives of nature and the environment. It is therefore highly important to study such narratives in works of literature, film, and other forms of cultural expression in relation to the specific circumstances from which they arise. *Nordic Narratives of Nature and the Environment* is the first English language anthology that presents ecocritical research on northern European literatures and cultures. The contributors examine specifically Nordic narratives of nature and the environment with a focus on the cultures and literatures of the modern northern European countries: Denmark, Finland, Norway, and Sweden, including Sápmi, which is the land traditionally inhabited by the indigenous Sami people. Covering northern European literatures and cultures over a period of more than two centuries, this anthology provides substantial insights into both old and new narratives of nature and the environment, as well as intertextual relations, the variety of cultural traditions, and current discourses connected to the Nordic environmental imagination. Case studies relating to works of literature, film, and other media shed new light on the role of culture, history, and society in the formation of narratives of nature and the environment and offer a comprehensive and multifaceted overview of the most recent ecocritical research in Scandinavian studies.

Sarasvatin hiekkää Risto Isomäki, 2016-03-02 Kiitetty ekologinen jännitysromaani, jonka tsunamiä koskevat kauhuvisiot ovat osoittautuneet pelottavan tosiksi. Pienistä puroista syntyy suuri virta ja pian koko ihmiskunnan tulevaisuus on vaakalaudalla. Onko tarpeeksi aikaa pelastautua? Intialainen meriarkelologi Amrita Desai tutkii Intian länsirannikolla meren pohjalta löytynyttä rauniokaupunkia. Mikä pysyy elävänä kaupungeissa kymmenen tuhatta vuotta sitten? Desai tarvitsee tutkimuksiinsa erikoissukellusveneen ja työkaluriksi ilmaantuu venäläinen Sergei Savelnikov. Samaan aikaan Grönlandin mannerjättilä alkaa tapahtua odottamattomia asioita. Suomalainen tutkija Kari Alanen havaitsee tekijän, joka yhdistää Cambaynlahden rauniot Grönlandin mannerjättilästä ja Bahamasaarten mystiset kivenlohkareet työllä tavalla. Risto Isomäki on Suomen johtava ympäristöuhkien asiantuntija, joka ekotrillerien lisäksi on julkaissut muun muassa tietokirjat 34 tapaa estää ilmaston ylikuumeneminen (Tammi 2009) ja Ydinvoima Fukushima (Jyväskylä 2011).

Arctic Hysteria and Other Strange Northern Emotions Elise Nykänen, 2024-11-08 *Arctic Hysteria and Other Strange Northern Emotions: Case Studies in Finnish Literature* opens a new perspective on the thriving area of research on the imagined North by studying emotions in the light of case studies in Finnish literature. The volume addresses the cultural history of Arctic hysteria and maps other strange emotions depicted and evoked in literature of the Finnish North. The volume comprises seven case studies which range from the works of internationally renowned authors such as Rosa Liksom, Emmi Itäranta, and

Tove Jansson to the affectively controversial and provocative writings of Timo K Mukka Marko Tapio and Pentti Linkola Drawing from the study of the imagined North and theories and tools in the study of literature and emotions the analyses show how such moods as melancholia ecstasy or a peculiar sense of November are generated in texts and how literary emotions entangle with the Northern environment they depict By focusing on the imagined North in Finnish modernism and contemporary literature the authors offer original views on experiences of late modernity merging with the changing Northern environment in the age of the Anthropocene *Books from Finland* ,2008 Nordic Speculative Fiction Jyrki Korpua,Aino-Kaisa Koistinen,Hanna-Riikka Roine,Marta Mboka Tveit,2024-12-20 This volume brings together scholarly theories and practices on speculative fiction from the Nordic countries including Denmark Finland Iceland Norway and Sweden that are all rooted in similar values culture and history yet are independent and unique societies The book exhibits both the convergences and the diversity of the Nordics in fiction and fandom as well as in research It traces the roots of Nordic speculative fiction how it has developed over time and how the changes in Nordic environments and societies caused by overhanging shared global issues such as climate change mass migration and technological acceleration find space in speculative practices The first of its kind this book allows for deeper insights into the unique characteristics that make Nordic literature and art recognisable and allows for a better understanding of the place of the Nordics within wider global culture systems The chapters range from literary critiques film and television studies creative works by three Nordic creative writers transcultural text comparisons and contributions on speculative art to theoretical and methodological discussions on fandom worldbuilding and semantics Part of the Studies in Global Genre Fiction series this book contributes to connecting Nordic speculative fiction scholarship to the wider global community within the field It will be of interest to scholars and general enthusiasts of speculative fiction and those with interest in Nordic fiction film and television studies literary culture or media studies comparative literature and cultural history or art based research **Climate Fiction and Cultural Analysis** Gregers Andersen,2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term s descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term s speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German

language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally
