India, Modernity and the Great Divergence Kaveh Yazdani, 2017-01-05 India Modernity and the Great Divergence is an original and pioneering book about India's transition towards modernity and the rise of the West. The work examines global entanglements alongside the internal dynamics of 17th to 19th century Mysore and Gujarat in comparison to other regions of Afro Eurasia. It is an interdisciplinary survey that enriches our historical understanding of South Asia ranging across the fascinating and intertwined worlds of modernizing rulers, wealthy merchants, curious scholars, utopian poets, industrious peasants and skilled artisans. Bringing together socio-economic and political structures, warfare, techno-scientific innovations, knowledge production and transfer of ideas, this book forces us to rethink the reasons behind the emergence of the modern world.

PROGRESSION OF KNOWLEDGE IN WESTERN CIVILIZATION Mirza Iqbal Ashraf, 2023-09-18 The word civilization, which is a relatively recent application from eighteenth century, when it came into currency, is generally invoked more with a rhetorical flourish than argued in philosophical perspective. But history of knowledge considers its true object is the study of human mind to know what his mind has believed, thought and felt in diverse periods of its progression in the history of a civilization. Mirza Iqbal Ashraf, as a research scholar of Islamic and Western philosophies, identifying the Four Explosions of Knowledge from ancient to modern time, the history of knowledge offers the readers in Progression of Knowledge in the Western Civilization uniquely within philosophical perspective that the Western world is a civilization of knowledge. This also means, whereas it is important to understand today's world so that we can deal with our contemporary period's civilizational challenges, it will be incomplete if we do not assess that modernity is born from the progress made by the knowledge of the past thinkers. But knowledge does not arrive fully formed; it requires many minds, specifically those minds which are free from the civilization's religious, cultural and geophysical trappings. In the Progression of Knowledge in Western Civilization, Ashraf has expounded that even in modern time, no knowledge is complete without visiting the knowledge of the past, especially of the great thinkers of Classical Greek period, the scholars at the House of Wisdom in Baghdad and the famous centers of knowledge at Cairo and Cordova of Arab Spain. In this book, the author has discussed when some other regions of the world might be familiar with philosophy and science in one way or another, why such a treasure of knowledge emerged particularly in Greece that became a foundation of voluminous work of literature in almost every field of knowledge and how it amazingly became the foundation of the history of progression of knowledge in the Western civilization which is timelessly flourishing until today.

Rethinking the New Technology of Journalism Seong Jae Min, 2022-03-15 News organizations have always sought to deliver information faster and to larger audiences. But when clicks drive journalism, the result is often simplistic, sensational and error-ridden reporting. In this book, Seong Jae Min argues in favor of slow journalism, a growing movement that aims to produce more considered, deliberate reporting that better serves the interests of democracy. Min explores the role of technology in journalism from the printing press to artificial intelligence.

documenting the hype and hope associated with each new breakthrough as well as the sometimes disappointing and even damaging unintended consequences His analysis cuts through the discussion of clickbait headlines and social media clout chasing to identify technological bells and whistles as the core problem with journalism today At its heart Min maintains traditional shoe leather reporting knocking on doors talking to people careful observation and analysis is still the best way for journalism to serve its civic purpose Thoughtful and engaging Rethinking the New Technology of Journalism is a compelling call for news gathering to return to its roots Reporters those studying and teaching journalism and avid consumers of the media will be interested in this book *The British Cyclopaedia of the Arts, Sciences, History, Geography, Literature, Natural History, and Biography ...* Charles Frederick Partington,1838 [The British cyclopaedia of the arts and sciences \(literature, history, geography, law and politics.
