Lettres, Arts, Sciences, &c ,1838 **Academy and Literature** Charles Edward Cutts Birch Appleton, Charles Edward Doble, James Sutherland Cotton, Charles Lewis Hind, William Teignmouth Shore, Alfred Bruce Douglas, Ellis Ashmead-Bartlett, Thomas William Hodgson Crosland, 1881 **Grove's Dictionary of Music and Musicians** George Grove, 1928 **Women and Early Modern Cultures of Translation** Hilary Brown, 2022 *Women and Early Modern Cultures of Translation Beyond the Female Tradition* is a major new intervention in research on early modern translation and will be an essential point of reference for anyone interested in the history of women translators. Research on women translators has often focused on early modern England; the example of early modern England has been taken as the norm for the rest of the continent and has shaped research on gender and translation more generally. This book brings a new European perspective to the field by introducing the case of Germany. It draws attention to forty women who can be identified as translators in sixteenth and seventeenth century Germany and shows how their work does not fit easily into traditional narratives about marginalization and subversiveness. The study uses the example of Germany to argue against reading the work of translating women primarily through the lens of gender and to challenge claims about the existence of a female translation tradition which transcends the boundaries of time and place. Broadening our perspective to include Germany provides a more nuanced and informed account of the position of women within European translation cultures and forces us to rethink gender as a category of analysis in translation history. The book makes the case for a new woman interrogated approach to translation history to borrow a concept from Carol Maier and as such it will provide a blueprint for future work in the area. Provided by publisher [Reading Early Modern Women](#) Helen Ostovich, Elizabeth Sauer, Melissa Smith, 2004. This remarkable anthology assembles for the first time 144 primary texts and documents written by women between 1550 and 1700 and reveals an unprecedented view of the intellectual and literary lives of women in early modern England.
