*Picture, illustration, info, activities*

The **Sunlight Zone** is the top layer of the ocean, stretching from the surface down to about 200 meters (656 feet). It gets the most sunlight, making it warm and full of life. Plants like seaweed and tiny phytoplankton create life here. This is where many marine animals live, including fish, dolphins, and sharks. Since there is so much light, many bright colors come from this zone.

**Dolphins** are mammals and need to come to the surface to breathe air through their blowholes. They also rely on sunlight to see and communicate with each other using clicks and whistles. Dolphins eat fish, squid, and crustaceans like shrimp and crabs.

Many ocean animals, including jellyfish and squid, come in from the Twilight Zone.
