

- 24 A group of students are conducting an experiment to determine the wavelength of monochromatic light from a laser. Fig. 24.1 shows the laser beam incident normally at a diffraction grating.

Fig. 24.1

The students use a diffraction grating with $600 \text{ lines mm}^{-1}$. They vary the distance x between the grating and the screen from 1.000 m to 2.000 m . They measure the distance y from the **central** maximum to the **second order** maximum.

- (a) The students decide to plot a graph of y against $\sqrt{x^2 + y^2}$.

Show that the gradient of the graph is equal to $\sin \theta$, where θ is the angle between the central maximum and the **second order** maximum.
