The Trans Pacific Partnership, China and India Amitendu Palit,2014-06-05 The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans Pacific Partnership TPP The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations It is expected to eventually mature into a regional trade agreement covering the entire Asia Pacific As of now it does not include China and India the two largest emerging markets and regional economies The TPP has generated controversy for its excessive emphasis on trade issues which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo political strategy of the US for supporting its strategic rebalancing towards Asia From both economic and geo political perspectives the TPP has various significant implications for China and India that are examined in the book This book sheds light on how China and India s entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward oriented reforms The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India Otherwise the TPP and China and India might walk divergent paths and trade and regional integration in Asia Pacific may not ever converge This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India s roles in global and regional trade **Professional Journal of the United States Army** ,2015 **Hrd Practices in Apsrtc** Dr. Santosha Pavani Tammineni,2016-06-28 A complete study on implementation of HRD practices in APSRTC at zonal level is rare in number In contrast to the earlier practices an attempt has been made by the researcher to trace out the impact of HRD practices on employees at zonal level and to investigate whether it is implemented in letter and spirit or not by reviewing operational performance of APSRTC and its financial function This work is not only an in depth study of HRD practices in APSRTC the study also presents an overview of the road transport sector in India With the advent of globalization transport sectors are confronted with challenges in improving productivity by successfully meeting the intense level of competition from its counterparts Business today is in a period of change and uncertainty The success will largely depend on how these challenges are matched with the utilization of human resources that is at our disposal It has been very unfortunate that the APSRTC has limited its human resource developmental practices for some cadres at apex level only without taking organizational climate of various zones into account while training their managerial personnel But the need of the hour is to put more emphasis on all the HRD practices at managerial level in the background of their level of climate The researcher looks at the problems of implementing HRD practices in the context of changing technological advancement and government policies Human Rights in Postcolonial India Om Prakash Dwivedi,V. G. Julie Rajan,2016-02-26 This volume

Bihar and Mithila J. Albert Rorabacher,2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right

questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates
