FastForward OEC Select Clear Image

OEC MTAS Site  
using Select Clear Image

Superb image quality and a wide range of clinical, surgical and vascular applications, the OEC MTAS site is an ideal system for the OEC OEC or surgical imaging or interventional setting.

OEC's latest digital mobile C-arm technology uses the patented "no image" or Motion-Enhanced Imageless technique that allows the user to perform OEC's Digital Subtraction Angiography (DSA) imaging while moving the C-arm in systems. This allows more imaging coupled with our unique Motion-Enhanced Imaging technology where motion imaging is now possible with improved productivity. Achieve the same benefits of subtraction without all the fuss.

OEC's advanced image processing performs faster than other image technologies and applies specific processing algorithms to effectively "denoise" the image, resulting in a cleaner, sharper image with less noise.

The advanced OEC technology processes each imaging profile uniquely to highlight the anatomy of interest. Flow and resolution are processed separately to achieve optimum definition according to the desired profile.

The comprehensive image quality and resolution enhancement is simply achieving the perfect imaging profile for a specific application. Simple. Certain. Proven.

Vas MTS... Breakthrough technology for improved vascular productivity.
