P. Nieuwenhuysen,John Higley,Stine Neerup,2009-01-01 These papers capture the pluralist phenomenon of two of the largest immigrant receiving countries of all time Within this 200 page volume then is to be found a truly informative mass of data complete with graphs tables and statistics and learned analyses pertaining to the twin focus of its title which will serve as a valuable tool of reference and reflection by all who have an interest in the subject Ramnik Shah Immigration Asylum and Nationality Law This timely book examines the immense surges in immigration since the mid 1990s in Australia and the United States two of the world's most important settler receiving countries Australia's shift to a points based skills oriented system is contrasted with the political deadlock that has prevented any basic change in US immigration policy during this period Focusing on immigration policy trends effects on labour markets successes and failures in integrating massive numbers of new immigrants and the future of multiculturalism the book ponders many of the policy dilemmas that confront both countries Drawing on extensive research findings in the field of immigration policy this book will prove a fascinating read for both scholars and postgraduate students working on immigration as well as undergraduates studying courses on Australia and comparisons of the Australian and American policy arenas Public servants engaged in administering Australian and US immigration policies will also find this book invaluable *OECD Regions at a Glance 2009* OECD,2009-03-23 Well over one third of the total economic output of OECD countries is generated by just 10% of OECD regions This one stop guide for understanding regional competitiveness provides comparative statistical information at the sub national level graphs maps and growth strategies Labour Mobility in the Asia-Pacific Region Graeme Hugo,Soogil Young,2008 Driven by demographic changes and reinforced by intensifying globalization international labour mobility has been on the rise in recent decades in the Asia Pacific region It seems that after trade and investment labour mobility constitutes the final frontier for regional integration among the Asia Pacific economies There is no doubt that labour movements are integral to regional economic integration and critical to the long term health of the regional economies and business operations In reality however such movements are much burdened with political and social problems in the labour origin economies as well as the labour destination economies and yet many of these problems remain not just unaddressed by the relevant governments but

not even well studied The present volume seeks to fill this gap by offering synthesis papers stemming from the studies on international labour migration in twenty Asia Pacific economies which were discussed at a joint PECC ABAC conference held in Seoul Korea on 25 26 March 2008 organized by KOPEC These papers examine the demographic transition the associated pattern of international labour migration the national policies associated with it as well as their implications for business and the issues they raise and finally the implications of these analyses for cooperation among the APEC governments for each of the four subregions in the Asia Pacific as well as for the whole region **OECD Journal on Development** ,2008

next consider why firms in retail wine and professional services were more successful than in financial services and shipping. Nine detailed case studies of firms then identify the elements of administrative heritage strategy and learning that have been the key to success or failure. **Havens in a Storm** J. C. Sharman, 2011-05-16 Small states have learned in recent decades that capital accumulates where taxes are low as a result tax havens have increasingly competed for the attention of international investors with tax and regulatory concessions Economically powerful countries including France Britain Japan and the United States however wished to stanch the offshore flow of domestic taxable capital Since 1998 the Organisation for Economic Co operation and Development OECD has attempted to impose common tax regulations on more than three dozen small states In a fascinating book based on fieldwork and interviews in twenty two countries in the Caribbean North America Europe and islands in the Pacific and Indian Oceans J C Sharman shows how the struggle was decided in favor of the tax havens which eventually avoided common regulation No other book on tax havens is based on such extensive fieldwork and no other author

has had access to so many of the key decision makers who played roles in the conflict between onshore and offshore Sharman suggests that microstates succeeded in their struggle with great powers because of their astute deployment of reputation and effective rhetorical self positioning In effect they persuaded a transnational audience that the OECD was being untrue to its own values by engaging in a hypocritical bullying exercise inimical to free competition
