Abstract---Supporting the agricultural sector is a topic that has been discussed for many years in the world and has been the governments' focus more than other economic sectors for many reasons, such as the nature of the agricultural sector, higher risk than other sectors, food security and nutrition and so on. Accordingly, the support of agricultural sector by different countries has varied depending on its importance in different countries of the world. The present study reviews and analyzes important policy changes, assessments, and recommendations in the context of the research in order to evaluate agricultural support policies in the member countries of the Organization for Economic Co-operation and Development (OECD), including Turkey, Korea and Japan. In this study, the latest agricultural policies in OECD countries are examined through measuring the parameters of agricultural support policies and using library studies. According to the studies, the OECD uses indicators such as Producer Support Estimate (PSE), Market Price Support (MPS), Producer Nominal Protection Coefficient (Producer NPC), Producer Nominal Assistance Coefficient (NACP), Consumer Support Estimate (CSE), General Services Support Estimate (GSSE), Total Support Estimate (TSE), and other related indicators to measure and classify the agricultural support based on a comprehensive system.

Keywords---OECD, Supportive Policies, Agriculture, Comprehensive System, Consumer, Producer.
