Prisonniers Du Fln:

, *Wartime Captivity in the 20th Century* Anne-Marie Pathé, Fabien Théofilakis, Helen McPhail, 2016-08-01 Long a topic of historical interest wartime captivity has over the past decade taken on new urgency as an object of study Transnational by its very nature captivity's historical significance extends far beyond the front lines ultimately inextricable from the histories of mobilization nationalism colonialism law and a host of other related subjects This wide ranging volume brings together an international selection of scholars to trace the contours of this evolving research agenda offering fascinating new perspectives on historical moments that range from the early days of the Great War to the arrival of prisoners at Guantanamo Bay

The Oxford Handbook of Late Colonial Insurgencies and Counter-Insurgencies Martin Thomas, Gareth Curless, 2023-10-10 The lethality of conflicts between insurgent groups and counter insurgent security forces has risen markedly since the Second World War just as those of conventional or inter state wars have declined For several decades conflicts within states rather than between them have been the prevalent form of organised political violence worldwide Recent conflicts in Afghanistan Iraq and Syria have fired interest in colonial experiences of rebellion while current western interventions in sub Saharan Africa have prompted accusations of militarist humanitarianism Yet despite mounting interest in counter insurgency and empire comparative investigation of colonial responses to insurrection and civil disorder is sparse Some scholars have written of a golden age of counter insurgency which began with Britain's declaration of a Malayan Emergency in 1948 and ended with the withdrawal of US ground troops from Vietnam in 1973 It is with this period if not with any presumed golden age that this volume is concerned This Handbook connects ideas about contested decolonization and the insurgencies that inspired it with an analysis of patterns and singularities in the conflicts that precipitated the collapse of overseas empires It attempts a systematic study of the global effects of organized anti colonial violence in Asia and Africa The objective is to reconceptualize late colonial violence in the European overseas empires by exploring its distinctive character and the globalizing processes underpinning it

[The Franco-Algerian War through a Twenty-First Century Lens](#) Nicole Beth Wallenbrock, 2020-02-20 The Franco Algerian War 1954-62 remains a powerful international symbol of Third Worldism and the finality of Empire Through its nuanced analysis of the war's depiction in film *The Franco Algerian War through a Twenty First Century Lens* locates an international reckoning with history that both condemns and exonerates past generations Algerian and French production partnerships such as *Hors la loi* Outside the Law Rachid Bouchareb 2010 and *Loubia Hamra* Bloody Beans Narimane Mari 2013 are one of several ways citizens collaborate to unearth a shared history and its legacy Nicole Beth Wallenbrock probes cinematic discourse to shed new light on topics including the media revelation of torture and atomic bomb tests immigration's role in the evolution of the war's meaning and the complex relationship of the intertwined film cultures The first chapter summarizes the Franco Algerian War in 20th century film thus grounding subsequent queries with Algeria's moudjahid or freedom fighter films and the French new wave

s perceived disinterest in the conflict This book is an invaluable resource for scholars seeking to understand cinema's role in re-evaluating war and reconstructing international memory

The Civilianization of War Andrew Barros, Martin Thomas, 2018-08-09 Distinguishing between civilians and combatants is a central aspect of modern conflicts Yet such distinctions are rarely upheld in practice The Civilianization of War offers new ways of understanding civilians exposure to violence in war Each chapter explores a particular approach to the political legal or cultural distinctions between civilians and combatants during twentieth century and contemporary conflicts The volume as a whole suggests that the distinction between combatants and non combatants is dynamic and oft times unpredictable rather than fixed and reciprocally understood Contributors offer new insights into why civilian targeting has become a strategy for some and how in practice its avoidance can be so difficult to achieve Several discuss distinct population groups that have been particularly exposed to wartime violence including urban populations facing aerial bombing child soldiers captives and victims of sexual violence The book thus offers multiple perspectives on the civil military divide within modern conflicts an issue whose powerful contemporary resonance is all too apparent

The End of Empires and a World Remade Martin Thomas, 2024-03-19 A capacious history of decolonization from the decline of empires to the era of globalization Empires until recently were everywhere They shaped borders stirred conflicts and set the terms of international politics With the collapse of empire came a fundamental reorganization of our world Decolonization unfolded across territories as well as within them Its struggles became internationalized and transnational as much global campaigns of moral disarmament against colonial injustice as local contests of arms In this expansive history Martin Thomas tells the story of decolonization and its intrinsic link to globalization He traces the connections between these two transformative processes the end of formal empire and the acceleration of global integration market reorganization cultural exchange and migration The End of Empires and a World Remade shows how profoundly decolonization shaped the process of globalization in the wake of empire collapse In the second half of the twentieth century decolonization catalyzed new international coalitions it triggered partitions and wars and it reshaped North South dynamics Globalization promised the decolonized greater access to essential resources to wider networks of influence and to worldwide audiences but its neoliberal variant has reinforced economic inequalities and imperial forms of political and cultural influences In surveying these two codependent histories across the world from Latin America to Asia Thomas explains why the deck was so heavily stacked against newly independent nations Decolonization stands alongside the great world wars as the most transformative event of twentieth century history In The End of Empires and a World Remade Thomas offers a masterful analysis of the greatest process of state making and empire unmaking in modern history

The Battle for Algeria Jennifer Johnson, 2016 The Battle for Algeria offers a new interpretation of the Algerian War 1954-1962 that highlights the social dimensions of the National Liberation Front's winning strategy specifically its health care and humanitarianism programs which targeted the local and international arenas and directly contributed to

Algerian sovereignty **Unconventional Warfare from Antiquity to the Present Day** Brian Hughes, Fergus Robson, 2017-07-03 This volume addresses the problem of small irregular and unconventional war across time and around the globe. The use of non-uniformed and often civilian combatants with tactics eschewing pitched battles is the most common form of warfare throughout history and comes in many forms. The collection works back in time beginning with the Long War in present-day Afghanistan and concluding with warfare in classical Greece. Along the way it engages with conflicts as diverse as the American Civil War and regional rebellion in Tudor England. Each case study provides unique insights into the practices, experiences, and discourses that have shaped this ubiquitous type of conflict. Readers interested in rebellion and repression, cultural and tactical interpretations of conflict, civilian strategies in wartime, the supposed western way of war, and the ways in which participants have framed and related their actions across a variety of spheres will find much of interest in these pages.

Algerian Independence and the British Left Mélanie Torrent, 2024-11-14 Based on archives from governments, parties, organisations, and individuals, this book investigates the relationship between the British left and Algerian liberation movements during the Algerian War of Independence, 1954-1962. It explores the presence of representatives of the Mouvement national algérien (MNA) and the Front de libération nationale (FLN) in London where they actively sought support for peace, independence from France, and the global end of European domination. By surveying their interactions with individuals and groups in the anticolonial left, including prominent Labour MPs and Trotskyist groups, Asian and African associations, and students' unions, Torrent shows how and why solidarity was interpreted differently across the left and in relation to Britain's own end-of-empire conflicts. Tracing connections across Europe and beyond, this book demonstrates how the war influenced conceptions of socialism, communism, and internationalism in Britain: what being European meant and what place the Commonwealth should have in a world where armed struggle and liberation diplomacy disrupted boundaries.

The Middle East in 1958 Jeffrey G. Karam, 2020-09-17 The revolutionary year of 1958 epitomizes the height of the social uprisings, military coups, and civil wars that erupted across the Middle East and North Africa in the mid-twentieth century. Amidst waning Anglo-French influence, growing US-USSR rivalry, and competition and alignments between Arab and non-Arab regimes, and domestic struggles, this year was a turning point in the modern history of the Middle East. This multi- and interdisciplinary book explores this pivotal year in its global, regional, and local contexts and from a wide range of linguistic, geographic, and academic specialties. The contributors draw on declassified and multilingual archives, reports, memoirs, and newspapers in thirteen country-specific chapters, shedding new light on topics such as the extent of Anglo-American competition after the Suez War, Turkey's efforts to stand as a key pillar in the regional Cold War, the internationalization of the Algerian War of Independence, and Iran and Saudi Arabia's abilities to weather the revolutionary storm that swept across the region. The book includes a foreword from Salim Yaqub which highlights the importance of Jeffrey G. Karam's collection to the scholarship on this vital moment in the political history of the modern middle east.
