Kool-Aid, Oh yeah!

It has been said that Kool-Aid makes the world go 'round. Let it be advised, however, that without the proper tools and directions, the great American beverage is nothing more than an envelope of unsweetened powder. There are five simple steps to create this candy-tasting concoction.

Picking the proper packet of flavoring is the first step in making Kool-Aid. Check the grocer's shelf for a wide variety, ranging from Mountain Berry Punch to Tropical Blue Hawaiian. If it is a difficult decision for you, knock yourself out and buy two. The packets usually run under 65 cents.

After choosing the flavor that best suits your taste buds, the second step is making sure that your kitchen houses some necessary equipment for making the Kool-Aid. Find a two-quart pitcher. Plastic is nice, but glass pitchers allow the liquid to shine through and add festive coloration to any refrigerator shelf. Next, find a long-handled wooden spoon, a one-cup measuring cup, a water faucet that spouts drinkable water, usable white sugar, and an ice-cube tray full of ice. Then, you are ready to mix.

Third, grab the left edge of the Kool-Aid packet between your thumb and index finger. With your other hand, begin peeling the upper-left corner until the entire top of the envelope is removed. Next, dump the contents of the envelope into the pitcher. Notice how the powder floats before settling on the bottom of the pitcher. Then, take the measuring cup and scoop two cups of sugar into the pitcher as well. At this point, adding the water is a crucial step. Place the pitcher under the water faucet and slowly turn on the cold water. If the water is turned on too quickly, powder will fly all over when the initial gusts of water hit. After the pitcher is filled within two inches of the top, turn the water off and get prepared to stir. With the wooden spoon submerged three-quarters of the way in the liquid, vigorously stir in a clockwise motion until all of the powder is dissolved. Taste it. If the Kool-Aid is not sweet enough, feel free to add more sugar.

Fourth, when you are finished seasoning the Kool-Aid to your liking, rinse off the spoon and the measuring cup. Take a glass from the cupboard. An eight-ounce glass is usually sufficient. But stronger thirsts might prefer a 32-ounce mug. Add ice and then fill the glass with Kool-Aid. Find a comfortable chair, put your feet up, and drink away. After all, Kool-Aid makes the world go 'round.

American Home Cooking Tim Miller, 2017-07-01 American Home Cooking provides an answer to the question of why in the face of all the modern technology we have for saving time Americans still spend time in their kitchens cooking Americans eat four to five meals per week in a restaurant and buy millions of dollars worth of convenience foods Cooking especially from scratch is clearly on its way out However if this is true why do we spend so much money on kitchen appliances both large and small Why are so many cooking shows and cookbooks published each year if so few people actually cook In American Home Cooking Timothy Miller argues that there are historical reasons behind the reality of American cooking

There are some factors that over the past two hundred years have kept us close to our kitchens while there are other factors that have worked to push us away from our kitchens. At one end of the cooking and eating continuum is preparing meals from scratch; all ingredients are raw and unprocessed and in extreme cases grown at the home. On the other end of the spectrum is dining out at a restaurant where no cooking is done but the family is still fed. All dining experiences exist along this continuum and Miller considers how American dining has moved along the continuum. He looks at a number of different groups and trends that have affected the state of the American kitchen stretching back to the early 1800s. These include food and appliance companies, the restaurant industry, the home economics movement of the early 20th century and reform movements such as the counterculture of the 1960s and the religious reform movements of the 1800s. And yet the kitchen is still most often the center of the home and the place where most people expect to cook and eat even if they don't.

The Architect, the Cook and Good Taste Petra Hagen Hodgson, Rolf Toyka, 2007-03-29 Since time immemorial cooking and building have been among humanity's most basic occupations. Both of them are rooted in necessity but both of them also possess a cultural as well as a sensory aesthetic dimension. And while it is true that cooking is a transitory art form, it gives expression to the periods of human cultural history just as architecture does. Moreover, both arts accord a central role to the materials employed. Both involve measuring and proportioning, shaping and designing, assembling and composing. This book pursues the astonishing parallels and deeply rooted connections between the art of building and that of cooking. A variety of essays takes up questions of materiality and proportioning. Attention will also be given to food cultivation and architecture to the places where meals are prepared as well as a range of different culinary spaces. With articles by Annette Gigon, Stanislaus von Moos, Claudio Silvestrin, Ian Ritchie and others.
