## **Robo Sapiens English Edition:**

Robo Sapiens Japanicus Jennifer Robertson, 2018 Japan is arguably the first postindustrial society to embrace the prospect of human robot coexistence. Over the past decade Japanese humanoid robots designed for use in homes, hospitals, offices, and schools have become celebrated in mass and social media throughout the world. In *Robo sapiens japanicus* Jennifer Robertson casts a critical eye on press releases and public relations videos that misrepresent robots as being as versatile and agile as their science fiction counterparts. An ethnography and sociocultural history of governmental and academic discourse of human robot relations in Japan, this book explores how actual robots, humanoids, androids, and animaloids are engineered in ways that reinforce the conventional sex/gender system and political/economic status quo. In addition, Robertson interrogates the notion of human exceptionalism as she considers whether civil rights should be granted to robots. Similarly, she juxtaposes how robots and robotic exoskeletons reinforce a conception of the normal body with a deconstruction of the much invoked Theory of the Uncanny Valley. *Robo Sapiens: Tales of Tomorrow (Omnibus)* Toranosuke Shimada, 2021-11-23 In the future, robots are more than machines. Autonomous cyber persons with AI brains are part of society, interacting with humans while developing their own culture. In fact, they may be surpassing humans as biological homo sapiens have begun to die out and give way to robo sapiens. But are humans truly disappearing, or are robots the newest form of humanity? This millennia-spanning speculative science fiction manga of interconnected stories, both human and robotic, was awarded the Division Grand Prize at the 2020 Japan Media Arts Festival. **Robo Sapiens** Peter Menzel, Faith D'Aluisio, 2000 Information about intelligent robots and their makers, including photographs, interviews behind the scenes, information, and technical data about machines that is easy to understand. **The Robosapien Companion** James Samans, 2007-04-29 You'll love *The Robosapien Companion*. Tips, Tricks, and Hacks, whether you're a robotics expert or beginner. And whether you own a Robosapien or not, you'll learn about the workings and theory of this fun robot. An owner of several Robosapiens himself, author Jamie Samans covers everything from basics like diagnosing and testing your new Robosapien to advanced topics like hacking and modifications. He thoroughly covers what he calls the curiosity and creativity of this famous bot. The book functions as both a practical user guide and an interesting read about the theory behind the machine. BEAM robotics: BEAM stands for biology, electronics, aesthetics, and mechanics. You'll learn about Robo's 67 unique functions and get the full scoop on the line of Robosapiens: the Robopet, the Roboraptor, and the bipedal Robosapien V2. By the book's end, you'll come to master your V1 or become fully prepared for the exciting upgrades included in V2. **AI and Common Sense** Martin W. Bauer, Bernard Schiele, 2024-06-28 Common sense is the endless frontier in the development of artificial intelligence, but what exactly is common sense? Can we replicate it in algorithmic form, and if we can, should we? They look at different ways we might understand common sense and which

of these ways are simulated within computer algorithms These include sensory integration self evident truths rhetorical common places and mutuality and intentionality of actors within a moral community How far are these possible features within and of machines Approaching from a range of perspectives including Sociology Political Science Media and Culture Psychology and Computer Science the contributors lay out key questions practical challenges and common sense concerns underlying the incorporation of common sense within machine learning algorithms for simulating intelligence socialising robots self driving vehicles personnel selection reading automatic text analysis and text production A valuable resource for students and scholars of Science Technology Society Studies Sociologists Psychologists Media and Culture Studies human computer interaction with an interest in the post human and programmers tackling the contextual questions of machine learning

**The Sower of Question Marks ???** Mark Eyskens, 2022-06-22 This book was born out of a long standing frustration due to the observation that a societal silence prevails on existential questions which we dare not talk about even in our highly interconnected world As if an embarrassment has seized our interlocutors struck by a certain metaphysical prudishness as soon as conversation turned to talking about life and death the meaning of our existence or fundamental values and their divine or human origin Is there life after death and Is there life before death are questions that I have never heard raised at the Parliament bar or in a waiting room of the university faculties This book is the result of a reaction to the

deficit of essential questioning at a time when digital and other forms of media inundate society This writing is not a philosophical essay nor is it a theological treatise a sociological manual a novel a collection of poems The truth is that it is all of these at the same time Hence the reader must browse the pages of this book with caution and prepare to encounter divergent intellectual landscapes planted with many question marks Furthermore since I will thoroughly discuss transcendence and what is hidden behind the visible and in the heart of the homo sapiens I had to appeal to allegories metaphors images and poetry Three allegories emerge most forcefully that of the homo interrogans the blind monk and that of the palimpsest three symbolic stories that try to unravel some signals of the mystery of being The first concerns the discovery made by an expedition of paleontologists in Africa of an anthropoid skeleton that thanks to the arrangement of the bones was buried in prehistoric times in the shape of a large question mark The second allegory is about a blind monk who knows the contents of all the books in the library and is apparently a visionary The third one is the story of the discovery of an old parchment in Jerusalem an enigmatic palimpsest the decoding of which could upset the understanding of our human condition Moreover a certain professor J C Mortal appears who can be considered as the spiritual twin of the author Life is a mystery to be lived and not a problem to be solved the sage Mahatma Gandhi taught us Yet in order to grasp the mystery it is necessary to ask the right questions
