

OCR A-level PHYSICS

2021 Paper 3

The potential difference between the sliding contact and the top of the overhead cable supplies a.c. The motor turns the wheels. The total mass of the train is 2.5×10^6 kg.

Tourists stand in pods around the circumference of the wheel. The floor remains horizontal at all times. At time $t = 0$, a tourist who has a weight W is at the position shown in Fig. 6.2. The forces acting on the tourist are the weight W and the reaction force R from the floor. The resultant upward force $(R - W)$ causes the rotation of the London Eye as shown in Fig. 6.3.
