**A manual of zoology** Henry Alleyne Nicholson,1878      **Plotting the Globe** Avraham Ariel,Nora Ariel

Berger,2005-12-30 People use concepts such as time and date to structure their lives on a daily basis They often measure their travel by marking points arranged along great circles on the globe Yet most do not understand the origin and history of these terms and the stories of the intrepid adventurers scientists and seafarers who shaped our picture of the world today Ariel transports readers to faraway lands and ancient cultures that span more than 3500 years of exploration Phoenicians Spaniards Portuguese British French and many others star in an epic that stretches from Lapland to Cape Horn via Greenwich Paris the Andes and the Fortunate Islands This book is a collection of stories and myths about geography navigation and geodesy the science that deals with the Earth s figure and the interrelationship of selected points on its surface that reaches far beyond dry scientific texts to concentrate on the people behind the discoveries The knowledge and understanding of abstract notions such as the Prime Meridian the Equator and the International Date Line is conveyed through emphasis on the human spirit that motivated the pioneer scientists and sailors It is a tale littered with heroes and villains battles tragedies and international intrigue Readers will learn of a time when nothing was certain even the shape and size of the earth were the subjects of fierce competition conflict and politics      The Eye of War Antoine

Bousquet,2018-10-09 How perceptual technologies have shaped the history of war from the Renaissance to the present From ubiquitous surveillance to drone strikes that put warheads onto foreheads we live in a world of globalized individualized targeting The perils are great In The Eye of War Antoine Bousquet provides both a sweeping historical overview of military perception technologies and a disquieting lens on a world that is increasingly one in which anything or anyone that can be perceived can be destroyed in which to see is to destroy Arguing that modern day global targeting is dissolving the conventionally bounded spaces of armed conflict Bousquet shows that over several centuries a logistical order of militarized perception has come into ascendancy bringing perception and annihilation into ever closer alignment The efforts deployed to evade this deadly visibility have correspondingly intensified yielding practices of radical concealment that presage a wholesale disappearance of the customary space of the battlefield Beginning with the Renaissance s fateful discovery of linear perspective The Eye of War discloses the entanglement of the sciences and techniques of perception representation and localization in the modern era amid the perpetual quest for military superiority In a survey that ranges from the telescope aerial photograph and gridded map to radar digital imaging and the geographic information system Bousquet shows how successive technological systems have profoundly shaped the history of warfare and the experience of soldiering A work of grand historical sweep and remarkable analytical power The Eye of War explores the implications of militarized perception for the character of war in the twenty first century and the place of human subjects within its increasingly technical armature      Catalogue - Harvard University Harvard University,1859      The Way of the Ship Alex

Roland,2007-11-01 The history of shipping in America as traditionally recounted is based primarily on the fortunes of the American merchant marine This book offers a global perspective and considers oceanic shipping and domestic shipping along America s coasts and inland waterways with explanations of the forces that influenced the way of the ship The result is an eye opening look at American maritime history and the ways it helped shaped the nation s history It features beautiful color images of paintings by today s premier marine artist John Stobart
