Math IQ Puzzles Frank Ho, Amanda Ho, 2016-12-13 This is an answers book for the student workbook Ultimate Math Contest Preparation Problem Solving Strategies Math IQ Puzzles for Grades 2 and 3 It has been almost 20 years since I published the first math contest workbook in 2002 This workbook is 3 in 1 one of a kind and world's first I believe In the past 20 years I created many workbooks and the reason simply is because I could not find suitable teaching materials to use at my own after school learning centre Why I created another workbook this time It is simply because there is a need for it Let me explain I created the following workbooks in the past 1 Basics 2 Math IQ puzzles 3 Math and Chess Integrated workbooks using my invention of Geometry Chess Symbols 4 Math IQ Fitness 5 Integrated math chess and puzzles for the Creative minds 6 Math Contest The trouble is with every class we have diversified students with different levels of math ability Some of them could participate in discussion some of them were always quiet They basically do not get full benefits by the discussion style of teaching So I discovered the method of student collaboration and the teach coaching method only makes sense when students are at the same level of play field otherwise the star will always be a star and others tend to fade away with no ideas to discuss at all How to handle this condition of teaching I need a good arsenal of workbooks For those who can do math contest quality problems I give them Math Contest books for those who need to boost their brain thinking skills I give them Math IQ Fitness for those who do not like play competitive chess I give them chess and math puzzles for those who are falling behind I give them Basics workbooks The result is many students end up with 4 to 6 workbooks on their desks The assignment marking also is a night mare With 2 hours math teaching I need a variety of teaching materials much like the entertainment variety show It would be boring if the singer continuously sing for 2 hours The same reason for teaching math to elementary students they need varieties of teaching contents so I decided to combine some of my workbooks into one that is why this combined workbook is so huge larger than most of the math workbooks you would find on the market This workbook is designed to teach in a very small class size preferably 4 or 5 students so that students could get lots of opportunities to discuss with the teacher One on one teaching would be ideal because the student get 100% attention constantly This workbook can be used in enrichment class because it includes many contest quality problems and thus could also be used for preparing math contests It includes many mathematical puzzles so it could be used as a fun math teaching workbook It also includes many mixed computations and advanced word problems so it could be used for chess clubs while teaching chess lessons The use of this workbook is multi faceted <https://www.scribd.com/document/334185794> Sample of 20 Pages of Ultimate Math Contest Grade 2
