

Investment levels in telecommunications - Successful turnaround after deregulation.

*EU-15 **Japan, Korea
Source: OECD (2007)

- Europe lags behind competing economic regions in terms of Telco-investments. Per capita levels are 50% higher in the US than in Europe.
- In addition, investment rates in the US are rising due to consistent deregulation.
- Result: the investment gap is widening.

Regulating Code Ian Brown, Christopher T. Marsden, 2013-03-01 The case for a smarter prosumer law approach to Internet regulation that would better protect online innovation public safety and fundamental democratic rights Internet use has become ubiquitous in the past two decades but governments legislators and their regulatory agencies have struggled to keep up with the rapidly changing Internet technologies and uses In this groundbreaking collaboration regulatory lawyer Christopher Marsden and computer scientist Ian Brown analyze the regulatory shaping of code the technological environment of the Internet to achieve more economically efficient and socially just regulation They examine five hard cases that illustrate the regulatory crisis privacy and data protection copyright and creativity incentives censorship social networks and user generated content and net neutrality The authors describe the increasing multistakeholderization of Internet governance in which user groups argue for representation in the closed business government dialogue seeking to

bring in both rights based and technologically expert perspectives Brown and Marsden draw out lessons for better future regulation from the regulatory and interoperability failures illustrated by the five cases They conclude that governments users and better functioning markets need a smarter prosumer law approach Prosumer law would be designed to enhance the competitive production of public goods including innovation public safety and fundamental democratic rights **Index to International Statistics** ,2000 **World Development Report 2016** World Bank Group,2016-01-14 Digital technologies are spreading rapidly but digital dividends the broader benefits of faster growth more jobs and better services are not If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone why can t others around the world do the same If 8 million entrepreneurs in China one third of them women can use an e commerce platform to export goods to 120 countries why can t entrepreneurs elsewhere achieve the same global reach And if India can provide unique digital identification to 1 billion people in five years and thereby reduce corruption by billions of dollars why can t other countries replicate its success Indeed what s holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver Two main reasons First nearly 60 percent of the world s population are still offline and can t participate in the digital economy in any meaningful way Second and more important the benefits of digital technologies can be offset by growing risks Startups can disrupt incumbents but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms Employment opportunities may be greater but not when the labor market is polarized The internet can be a platform for universal empowerment but not when it becomes a tool for state control and elite capture The World Development Report 2016 shows that while the digital revolution has forged ahead its analog complements the regulations that promote entry and competition the skills that enable workers to access and then leverage the new economy and the institutions that are accountable to citizens have not kept pace And when these analog complements to digital investments are absent the development impact can be disappointing What then should countries do They should formulate digital development strategies that are much broader than current information and communication technology ICT strategies They should create a policy and institutional environment for technology that fosters the greatest benefits In short they need to build a strong analog foundation to deliver digital dividends to everyone everywhere **FCC Record** United States. Federal Communications Commission,2016 *Africa's Development Dynamics 2021 Digital Transformation for Quality Jobs* African Union Commission,OECD,2021-01-19 Africa s Development Dynamics uses lessons learned in the continent s five regions Central East North Southern and West Africa to develop policy recommendations and share good practices Drawing on the most recent statistics this analysis of development dynamics attempts to help African leaders reach the targets of the African Union s Agenda 2063 at all levels continental regional national and local [World Development Report 2021](#) World Bank,2021-07-02 The unprecedented growth of data and its ubiquity in our daily lives signal that the digital revolution is transforming the world But much of the value of data remains

untapped waiting to be realized Data collected for one particular purpose has the potential to generate economic value in applications far beyond those originally anticipated However many barriers stand in the way of the beneficial reuse of data ranging from misaligned incentives and incompatible data systems to a fundamental lack of trust The World Development Report 2021 Data for Better Lives will explore the tremendous potential of the changing data landscape to improve the lives of poor people but also to open backdoors that can harm individuals businesses and societies The first part of the report assesses how better use and reuse of data can enhance the design of public policies programs and service delivery as well as improve market efficiency and job creation through private sector growth The second part of the report focuses on issues of governance law and policy that can help realize data s potential benefits while safeguarding against harmful outcomes By examining these issues the report aims to show how data can be leveraged to benefit the lives of poor people
