Cities and Local Governments in Central Asia Madina Junussova, 2020-02-28 This book presents the changing roles of urban governments and how local governments struggle to gain administrative fiscal and political power to combat current urban challenges in Kazakhstan Focusing on the cities and regions selected by the national government of Kazakhstan to be the drivers of national economic development the author analyses the impact of decentralization on the role of local governments The book examines the practical experiences of city and regional governments with an emphasis on urban planning public investment in national projects and management of urban transport Due to the complexity and irregular distribution of political reforms at different levels of local government in Kazakhstan three separate studies are presented each looking at a specific aspect of decentralization reform and local government function related to physical urban development and distribution of public investment The author argues that if the national government of Kazakhstan wants to concentrate economic resources in urban agglomerations it is not enough to assume that local governments are ready to play the role of efficient planners and managers of urban development A useful analysis illustrating cities and urban conglomerations as engines of growth in economic development this book will be of interest to academics studying Central Asian Studies in particular political and economic development Development Studies and Urban Studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

China's Economy Arthur R. Kroeber, 2020 China's economic growth has been revolutionary and is the foundation of its increasingly prominent role in world affairs It is the world's second biggest economy the largest manufacturing and trading nation the consumer of half the world's steel and coal the biggest source of international tourists and one of the most influential investors in developing countries from southeast Asia to Africa to Latin America Multinational companies make billions of dollars in profits in China each year while traders around the world shudder at every gyrations of the country's unruly stock markets Perhaps paradoxically its capitalist economy is governed by an authoritarian Communist Party that shows no sign of loosening its grip China is frequently in the news whether because of trade disputes the challenges of its Belt and Road initiative for global infrastructure or its increasing military strength China's political and technological challenges created by a country whose political system and values differ dramatically from most of the other major world economies creates uncertainty and even fear China's Economy What Everyone Needs to Know is a concise introduction to the most astonishing economic and political story of the last three

decades Arthur Kroeber enhances our understanding of China's changes and their implications. Among the essential questions he answers are: How did China grow so fast for so long? Can it keep growing and still solve its problems of environmental damage, fast rising debt and rampant corruption? How long can its vibrant economy co-exist with the repressive one party state? How do China's changes affect the rest of the world? This thoroughly revised and updated second edition includes a comprehensive discussion of the origins and development of the US-China strategic rivalry including Trump's trade war and the race for technological supremacy. It also explores the recent changes in China's political system reflecting Xi Jinping's emergence as the most powerful leader since Mao Zedong. It includes insights on changes in China's financial sector covering the rise and fall of the shadow banking sector and China's increasing integration with global financial markets. And it covers China's rapid technological development and the rise of its global Internet champions such as Alibaba and Tencent.

China's Uneven and Combined Development Steven Rolf, 2020-10-15. This book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of China's rise. The purpose is to explain the formation and trajectory of its economic accumulation system which remains a confounding hybrid of statist and neoliberal forms of capitalism as the outcome of China's geopolitical engagement of the USA during the late stages of the Cold War and its participation in manufacturing global production networks (GPNs). Fear of geopolitical catastrophe drove China to open its economy while GPNs enabled China to generate substantial export surpluses which could be recycled through state-owned banks as cheap credit and subsidies to large vertically integrated and politically controlled state-owned enterprises. In this way a synergy emerged between the neoliberal and Keynesian Fordist sectors of the economy while the national territorial state retained its form and expanded its functions. The book chronicles how this reliance on export surpluses however rendered China extremely vulnerable to external shocks prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008 even while sustaining the illusion of economic decoupling from the global economy. Finally it examines the growing role of the state in the current crisis-ridden economic model as well as China's current geoeconomic and geopolitical expansionism in areas such as the Belt and Road Initiative and the militarisation of the East and South China Seas.

The Dark Side of Globalisation Leila Simona Talani, Roberto Roccu, 2019-03-28. Firmly rooted in the International Political

Economy IPE tradition this book addresses the negative consequences of globalisation what is termed here the dark side of globalisation It explores different definitions of globalisation whether the globalisation we have seen since the 1970s is substantially new and to what extent it can be governed Building on these foundations the work assesses the prospects for de globalisation By focusing on this dark side of globalisation the authors show how the global economic crisis and its various local and sectorial manifestations intensified rather than generated existing trends This scholarship provides an account of the current predicament that is both more complex and more persuasive than the opposition between globalisation and de globalisation

Identity, Policy, and Prosperity Jeongwon Bourdais Park,2017-08-11 This book offers a rare glimpse into China s Korean minority which dominates the area bordering North Korea even as Korea is riven into capitalist and communist societies China s Koreans register this dilemma as one internal to the society they live in in China s postindustrial Northeast As this research makes clear once driven by state investment in industry the Northeast is now struggling to define its identity as a post industrial region the ethnic Koreans there even more so This monograph provides a distinctive look at a group shaped by political turmoil economic transformation and cultural struggle the study may offer an idea of what the future of the Korean peninsula itself might be disentangling the puzzling contradictions and synergies between nationality locality and development in China

The Routledge Handbook of Planning Megacities in the Global South Deden Rukmana,2020-06-04 Cities are now home to 55% of the world s population and that number is rising Urban populations across the world will continue to grow including in megacities with populations over ten million In 2016 there were 31 megacities globally according to the United Nations World Cities Report with 24 of those cities located in the Global South That number is expected to rise to 41 by 2030 with all ten new megacities in the Global South where the processes of urbanization are intrinsically distinct from those in the Global North The Routledge Handbook of Planning Megacities in the Global South provides rigorous comparative analyses discussing the challenges processes best practices and initiatives of urbanization in Middle America South America the Middle East Africa South Asia East Asia and Southeast Asia This book is indispensable reading for students and scholars of urban planning and its significance as a resource will only continue to grow as urbanization reshapes the global population

Metropolitan Economic Development Alejandra Trejo Nieto, José L. Niño-Amézquita,2019-08-28 Metropolitan areas are home to a significant proportion of the world s population and its economic output Taking Mexico as a case study and weaving in comparisons from Latin America and developed countries this book explores current trends and policy issues around urbanisation metropolisation economic development and city region governance Despite their fundamental economic relevance the analysis and monitoring of metropolitan economies in Mexico and other countries in the Global South under a comparative perspective are relatively scarce This volume contains empirical analysis based on comparative perspectives with relation to international experiences It will be of interest to advanced students researchers and policymakers in urban policy urban economics regional studies economic geography and Latin
