Tucker,2010-10-08 This in depth study of U S involvement in the modern Middle East carefully weighs the interplay of domestic cultural religious diplomatic international and military events in one of the world s most troubled regions The monumental five volume The Encyclopedia of Middle East Wars The United States in the Persian Gulf Afghanistan and Iraq Conflicts is a must have resource for anyone seeking to comprehend U S actions in this volatile region Under the expert editorship of Spencer C Tucker the encyclopedia traces 20th and 21st century U S involvement in the Middle East and south central Asia concentrating on the last three decades Beginning with the 1980 1988 Iran Iraq War it covers the 1979 1989 Soviet occupation of Afghanistan the 1991 Persian Gulf War allied punitive actions against Iraq during the 1990s the Afghanistan War the Iraq War and the Global War on Terror Many smaller military actions against Iran Iraq Libya Afghanistan and other regimes that have been involved in international terrorism are also included Diplomacy religion as it pertains to Middle East conflict and social cultural developments are other key subjects of analysis as is the interplay of politics with military policy in the United States and other nations involved in the region **Photography and September 11th** Jennifer Good,2020-09-13 It is all but impossible to think of September 11th 2001 and not at the same time recall an image The overwhelmingly visual coverage in the world s media pictured a spectacle of terror from images of the collapsing towers to injured victims and fatigued firefighters In the days weeks and months that followed this vast collection of photographs continued to circulate relentlessly This book investigates the psychological impact of those photographs on a stunned American audience Drawing on trauma theory this book asks whether the prolonged exposure of audience to photographs was cathartic or damaging It explores how first the collective memory of the event was established in the American psyche and then argues that through repetitive use of the most powerful pictures the culture industry created a dangerously simple 9 11 metanarrative At the same time people began to reclaim and use photography to process their own feelings most significantly in communities of photographic memorial websites Such exercises were widely perceived as democratic and an aid to recovery This book interrogates that assumption providing a new understanding of how audiences see and process news photography in times of crisis

The Presidency of George W. Bush John Robert

Greene,2021-10-15 The Presidency of George W Bush is the first balanced academic study to analyze the entirety of his presidency domestic social economic and national security policies as well as the administration s response to 9 11 and the subsequent War on Terror In so doing John Robert Greene argues persuasively that the judgment of most scholars that the Bush administration was a complete failure has been made in haste and without the benefit of primary sources This book is the first scholarly work to make wide use of the documents at the George W Bush Presidential Library many of which have only recently been made available to researchers through the Freedom of Information Act John Robert Greene offers a balanced assessment and nuanced conclusions supported by documentary evidence Yet in doing so he does not absolve the

Bush administration of its shortcomings The Presidency of George W Bush shows that the administration could be vindictive as demonstrated by the Plame Wilson affair and the firing of the US attorneys It all too often moved too slowly as shown by the National Security Council's lethargic handling of terrorism pre 9 11 the failed attempt to revise Social Security and the sluggish reaction to Hurricane Katrina It was an administration that accepted and acted on the highly suspect theory of the unitary presidency as advocated by Dick Cheney and accepted by the president On the other side of the balance sheet however the evidence also makes it eminently clear that the Bush administration was responsible for many positive achievements No Child Left Behind set the nation on the road toward affecting serious educational reform In healthcare reform the Bush administration both strengthened the Medicare system and extended its benefits for millions of Americans And Bush did more to combat the worldwide scourge of AIDS particularly in Africa than any other president In sum the actions of this presidency continue to affect the presidencies of each of his successors as well as the trajectory of world history to the present day **Commanders Digest** ,1973 *Air University Library Index to Military Periodicals* ,1979

The World Book Encyclopedia World Book, Inc,1997 An encyclopedia designed especially to meet the needs of elementary junior high and senior high school students **American Military History** Daniel K. Blewett,2008-12-30 In this companion volume to his 1995 bibliography of the same title Daniel Blewett continues his foray into the vast literature of military studies As did its predecessor it covers land air and naval forces primarily but not exclusively from a U S perspective with the welcome emergence of small wars from publishing obscurity In addition to identifying relevant organizations and associations Blewett has gathered together the very best in chronologies bibliographies biographical dictionaries indexes journals abstracts glossaries and encyclopedias each accompanied by a brief descriptive annotation This work remains a pertinent addition to the general reference collections of public and academic libraries as well as special libraries government documents collections military and intelligence agency libraries and historical societies and museums
