Collapsing Gracefully: Making a Built Environment that is Fit for the Future Emilio Garcia,Brenda Vale,Robert Vale,2021-07-24 This innovative book investigates the concept of collapse in terms of our built environment exploring the future transition of modern cities towards scenarios very different from the current promises of progress and development This is not a book about the end of the world and hopeless apocalyptic scenarios It is about understanding change in how and where we live Collapse is inevitable but in the built environment collapse could imply a manageable situation an opportunity for change or a devastating reality Collapsing gracefully means that there might be better ways to coexist with collapse if we learn more about it and commit to rebuild our civilisations in ways that avoid its worst effects This book uses a wide range of practical examples to study critical changes in the built environment to contextualise and visualise what collapse looks like to see if it is possible to buffer its effects in places already collapsing and to propose ways to develop greater resilience The book challenges all agents and institutions in modern cities their designers and planners as well as their residents and users to think differently about built environment so as to ease our coexistence with collapse and not contribute to its causes *Companies on a Mission* Michael V.

Russo,2010-04-06 Let your social and environmental conscience be your guide can be a successful and durable strategy for a firm This is the first book to explain how following a vision for the earth and for society can be a powerful route to profits for small and medium sized companies *Companies on a Mission* explains that mission driven companies appreciate and leverage traditional strategic principles with a twist to win in the marketplace By clearly and pragmatically laying out this argument author Michael V Russo crystallizes for enlightened businesses what Michael Porter made clear for mainstream firms years ago The book shows that a mission driven approach creates significant barriers to imitation by larger established rivals Mission driven firms build their brands on authenticity Only you are you And authenticity builds customer loyalty Later in the book Russo moves beyond the firm level to look at these companies in context He finds for instance that just as specific industries often develop in geographic clusters mission driven companies also aggregate But they put down roots where other businesses are pursuing complementary goals Portland and the Bay Area are two such hotbeds This allows for cooperation as opposed to breeding stiff competition The rise to prominence of mission driven companies like Patagonia Seventh Generation Kettle Foods and Calvert Group is undoubtedly the result of powerful trends in consumer markets including the rise of conscious consumerism the transparency movement and fallout from global competition Most books that

address social and environmental issues are focused on large corporations crafted as autobiographies by CEOs or written as moral calls to action without regard for the bottom line Companies on a Mission both chronicles a movement and provides grounded guidance to entrepreneurs and managers who wish to join the wave For these readers this book is a one of a kind bible Books and Pamphlets, Including Serials and Contributions to Periodicals Library of Congress.
