Develop Your Own Rock Cycle Worksheet **Answer Key**

The rock cycle is the idea that the three main types of rock (sedimentary, metamorphic and igneous) undergo physical changes enabling each to change into any of the others. In other words, sedimentary can become metamorphic and/or igneous. Igneous can become sedimentary and/or metamorphic, and so forth.

The bullets below provide information on how each type of rock is formed.

- Any type of rock that undergoes heat and/or pressure can become *metamorphic* rock.
- Any type of rock that undergoes weathering and erosion turns into **sediment**.
- Any **sediment** that compacts or cements together can become *sedimentary* rock.
- *Igneous* rock is formed from cooling **magma**.
- **Magma** is formed from melting of *sedimentary*, *igneous* and *metamorphic* rock.

Using the above information, draw your own diagram to model the rock cycle. Your model should have five main categories – one for each of the types of rock and one for each of the intermediate stages (sediment and magma). **Below is an example of the rock cycle. Forms of solutions may vary, but content should be the same.**

Rock Cycle Answer Key

Terry C. Jones

Rock Cycle Answer Key:

Getting the books **Rock Cycle Answer Key** now is not type of challenging means. You could not deserted going following book collection or library or borrowing from your friends to read them. This is an completely easy means to specifically acquire lead by on-line. This online pronouncement Rock Cycle Answer Key can be one of the options to accompany you behind having supplementary time.

It will not waste your time. how to me, the e-book will utterly way of being you supplementary event to read. Just invest tiny grow old to entry this on-line broadcast **Rock Cycle Answer Key** as without difficulty as review them wherever you are now.
