Hudson,2012 The purpose of this study was to examine if the Rocket Math Mastering Math Facts instructional program Crawford 2003 was effective to produce high student growth in multiplication fact 0 9 fluency automaticity and mastery for 37 fourth grade students at a medium sized suburban rural school district in the Midwest during the 2011 2012 academic year The research included findings that answered the question Is there a difference in student mean scores between pre and post student test scores The data was also analyzed to establish student growth and mastery of multiplication facts taken from abstract     **Division and Multiplication** Rebecca Wingard-Nelson,2014-01-01 Readers learn to do long division with remainders how to multiply two digit numbers and get great tips for solving word problems Multiply and divide fractions and decimals and learn how to estimate This book can be read from beginning to end or used to review a specific topic     110 Amazing Apps for Education Rane Anderson,2012-02-01 Here s an easy to use quick reference guide for apps that supplement student learning It gives suggestions for how teachers can implement each app in the classroom and for how parents can use the apps at home to extend their child s learning This resource is correlated to the Common Core State Standards is aligned to the interdisciplinary themes from the Partnership for 21st Century Skills and supports core concepts of STEM instruction 136pp     **Traditional Math: An effective strategy that teachers feel guilty using** Barry Garelick,J. R. Wilson,2022-11-04 Despite experiencing our teaching in different times we are both oriented to traditional math teaching It wasn t because we were both taught that way as some may believe but because that method worked for us and we have

seen it work for our students It is efficient effective non confusing and helped our students develop mathematical reasoning understanding and confidence Most importantly it helped them to be successful So begins the book on traditional math which provides a glimpse of what explicit instruction looks like in the classroom for grades K through 8 Barry Garelick and J R Wilson are retired math teachers who describe the methods of traditionally taught math that they used in their teaching Their descriptions serve two purposes 1 It provides assurance to teachers who may already practice these methods that they are not alone and 2 For others it may provide some new ideas

### **Reconceptualizing Early Mathematics Learning** Lyn D.

English, Joanne T. Mulligan, 2013-05-09 This book emanated primarily from concerns that the mathematical capabilities of young children continue to receive inadequate attention in both the research and instructional arenas Research over many years has revealed that young children have sophisticated mathematical minds and a natural eagerness to engage in a range of mathematical activities As the chapters in this book attest current research is showing that young children are developing complex mathematical knowledge and abstract reasoning a good deal earlier than previously thought A range of studies in prior to school and early school settings indicate that young learners do possess cognitive capacities which with appropriately designed and implemented learning experiences can enable forms of reasoning not typically seen in the early years Although there is a large and coherent body of research on individual content domains such as counting and arithmetic there have been remarkably few studies that have attempted to describe characteristics of structural development in young students mathematics Collectively the chapters highlight the importance of providing more exciting relevant and challenging 21st century mathematics learning for our young students The chapters provide a broad scope in their topics and approaches to advancing young children s mathematical learning They incorporate studies that highlight the importance of pattern and structure across the curriculum studies that target particular content such as statistics early algebra and beginning number and studies that consider how technology and other tools can facilitate early mathematical development Reconceptualising the professional learning of teachers in promoting young children s mathematics including a consideration of the role of play is also addressed
