Role Of Ict In Governance:

What Kind of Information Society? Governance, Virtuality, Surveillance, Sustainability, Resilience Jacques J. Berleur, Magda David Hercheui, Lorenz M. Hilty, 2010-08-06 The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane Australia September 20-23 organised by the International Federation for Information Processing IFIP In the first part the reader can find the proceedings of the 9th Human Choice and Computers International Conference HCC9 organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society The HCC9 part is subdivided into four tracks Ethics and ICT Governance Virtual Technologies and Social Shaping Surveillance and Privacy and ICT and Sustainable Development The second part consists of papers given at the Critical Information Infrastructure Protection Conference CIP organized by the IFIP Technical Committee TC11 on Security and Privacy Protection in Information Processing Systems The two parts of the book are introduced by the respective Conference Chairs Chapter 1 introduces HCC9 providing a short summary of the HCC conference series which started in 1974 and explaining the overview of HCC9 detailing the rationale behind each of the tracks in this conference The details related to the papers of each track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 Chaps 2-10-16 and 22 Finally Chap 22 introduces the CIP part *ICT, Public Administration and Democracy in the Coming Decade* A.J. Meijer, F. Bannister, M. Thaens, 2013-06-20 The physicist Neils Bohr allegedly wrote that Prediction is very difficult especially about the future Many academics believe that serious scholars should never attempt to write about the future but some awareness of the ways in which the future of e government may evolve is needed if well grounded long term decisions about issues such as infrastructures institutions and educational programs are to be made In addition future oriented research is of the utmost importance for informed public debate about technological developments with far reaching societal implications This book marks the 25th anniversary of the permanent study group on e government of the European Group for Public Administration and the papers here were first presented at their 2012 meeting in Bucharest Romania The invited authors were not asked for rigorous analyses based on systematic empirical research or deeply rooted in a theoretical framework instead they were challenged to write thoughtful and measured but provocative essays about ICT and public administration in the coming decade Their contributions are reflections on the nature of new and emerging technologies in the public sector and their impact on government and on democracy itself The book is divided into three sections the past and present as starting point for thinking about the future of e government imagining the future of government and implications for research and practice The many questions raised by developments in ICT for future public administration are presented in a clear and thought provoking manner and merit more debate This volume represents a departure from the normal run of academic publications It is intended both to provoke academics and administrators to think about questions which will affect all of our futures and to offer a range of creative ideas about how the opportunities presented by technology

can be exploited to provide better government and governance

Professionalism in the Information and

Communication Technology Industry John Weckert, Richard Lucas, 2013-10-15 Professionalism is arguably more important in some occupations than in others It is vital in some because of the life and death decisions that must be made for example in medicine In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation The core idea behind this book is that Information and Communication Technology ICT is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind
