North West University Application Form For 2015

Jako Olivier

North West University Application Form For 2015:

Application of LC-MS/MS in the Mycotoxins Studies Laura Gámiz-Gracia, Ana M. García-Campaña, Natalia Arroyo-Manzanares, 2020-06-17 Mycotoxins are secondary metabolites produced by the fungi of different species mainly *Aspergillus*, *Fusarium* and *Penicillium* with toxic effects for humans and animals. These mycotoxins can contaminate food and feed. The European Union (EU) has established the maximum permitted or recommended levels for well known mycotoxins in different foodstuffs. However, there are other mycotoxins that are not included in the regulations, the emerging mycotoxins whose toxicity is still not clear and the modified or masked mycotoxins produced as a consequence of a detoxification strategy of the host plant of the fungus or during food processing. These mycotoxins could pose a risk and should also be taken into account. In order to assure consumers' health, analytical methods for the accurate determination of mycotoxins in different food matrices and feeds are required. In this sense, liquid chromatography tandem mass spectrometry (LC-MS/MS) is a powerful tool for their unique identification and quantification. Moreover, the use of high resolution mass spectrometry (HRMS) allows one to identify novel mycotoxins and targeted/untargeted approaches for study. This Special Issue compiles recent applications of LC-MS/MS in mycotoxin studies, as well as the development and validation of new analytical methods for their identification and quantification in different food matrices and feed occurrence studies and the biomonitoring of mycotoxins and their metabolites in biological fluids.

The First Global Integrated Marine Assessment United Nations, 2017-04-17 The World Ocean Assessment or to give its full title The First Global Integrated Marine Assessment is the outcome of the first cycle of the United Nations Regular Process for Global Reporting and Assessment of the State of the Marine Environment including Socioeconomic Aspects. The Assessment provides vital scientifically grounded bases for the consideration of ocean issues including climate change by governments, intergovernmental agencies, non-governmental agencies and all other stakeholders and policymakers involved in ocean affairs. Together with future assessments and related initiatives, it will support the implementation of the recently adopted 2030 Agenda for Sustainable Development, particularly its ocean-related goals. Moreover, it will also form an important reference text for marine science courses.

The Diffusion of Law Sue Farran, James Gallen, Christa Rautenbach, 2016-03-09 In considering diffusion from a global perspective, this book provides timely new insights into its application in a variety of fields and at many levels of both legal and non-legal orderings. This collection contributes to the wider theoretical debate concerning the movement of law and legal norms by engaging with concrete examples of legal diffusion in jurisdictions as diverse as Albania, the Czech Republic, Poland and Kuwait. These examples taken together provide a comprehensive illustration of the theoretical debates concerning the diffusion of laws and norms in terms of both process and form. This international, multi-disciplinary and multi-methodological volume brings together scholars from law and social science with experience in mixed and hybrid jurisdictions and advances the
