McClure's Magazine, 1912 *The Communications act of 1978* United States. Congress. House. Committee on Interstate and Foreign Commerce. Subcommittee on Communications, 1979 **The Beauty of a Social Problem** Walter Benn Michaels, 2015-07-13 Bertolt Brecht once worried that how we feel about the victims of a social problem can get in the way of the beauty and attraction of the problem itself In this book Walter Benn Michaels explores the same dilemma through a study of several contemporary artist photographers whose work speaks to questions of political economy Michaels focuses on the work of several artists mostly born in the 1970s and thus raised in a world where artistic ambition has been identified with a critique of autonomous form and of meaning as a function of intention Michaels shows that these artists engage but also push beyond this critique of autonomy and intentionality producing works that embody a new commitment to form and meaning The explanation for this commitment he argues is these artists consciousness of making art in an economy riven by structural conflict especially an unprecedented rise in inequality For them he argues the relationship of the art work to the world to its subject and to its beholder functions as an emblem of the relation between classes rather than identities or subject positions This book will join the short shelf of essential writings about the medium of photography Voices and Books in the English Renaissance Jennifer Richards, 2019 Discusses how literary culture in the Renaissance was fundamentally oral and studies a variety of literary soundscapes from the schoolroom to the printing house to explore why and how sound was meaningful to Renaissance writers **The Spirit of the Game** Mihir Bose, 2012-01-19 The spirit of the game was first nurtured on the playing fields of the English public school and in the pages of Tom Brown's Schooldays this Corinthian spirit was then exported around the world The competitive spirit the importance of fairness the nobility of the gifted amateur seemed to sum up everything that was good about Britishness and the games they played Today sport is dominated by corruption money celebrity and players who are willing to dive in the box if it wins them a penalty Yet we still believe and talk about the game as if it had a higher moral purpose Since the age of Thomas Arnold Sport has been used to glorify dictatorships and was at the heart of cold war diplomacy Prime Ministers princes and presidents will do whatever they can to ensure that their country holds a major sporting tournament Nelson Mandela saw the victory of the Rugby World Cup as essential to his hopes for the Rainbow Nation Mihir Bose has lived his life around sport and in this book he tells the story of how Sport has lost its original spirit and how it has emerged in the 20th century to become the most powerful political tool in the world With examples and stories from around the world including how the sport hating Thomas Arnold became an icon how a German manufacturer gave Jessie Owens a pair of shoes at the Berlin games of 1936 and went on to dominate the world of sport how India stole cricket from the ICC how an Essex car dealer became the most powerful man in Formula 1 and who really sold football out Praise for Mihir Bose Mihir Bose is India's CLR James Simon Barnes The Times Mihir's insider knowledge is unsurpassed David Welch His Olympic contacts are second to none He knows everybody Sue Mott *People*

Rooke, 2012-02-23 Combining the insights of present day biblical studies with those of Handelian studies this book examines the libretti of ten of Handel's Israelite oratorios and evaluates the relationship between each libretto and the biblical story on which it is based **The Cartographic Imagination in Early Modern England** D K Smith, 2013-04-28 Working from a cultural studies perspective author D K Smith here examines a broad range of medieval and Renaissance maps and literary texts to explore the effects of geography on Tudor Stuart cultural perceptions He argues that the literary representation of cartographically related material from the late fifteenth to the early seventeenth century demonstrates a new strain not just of geographical understanding but of cartographic manipulation which he terms the cartographic imagination Rather than considering the effects of maps themselves on early modern epistemologies Smith considers the effects of the activity of mapping the new techniques the new expectations of accuracy and precision which developed in the sixteenth century on the ways people thought and wrote Looking at works by Spenser Marlowe Raleigh and Marvell among other authors he analyzes how the growing ability to represent physical space accurately brought with it not just a wealth of new maps but a new array of rhetorical techniques metaphors and associations which allowed the manipulation of texts and ideas in ways never before possible
