Low Fertility Regimes and Demographic and Societal Change Dudley L. Poston, Jr., 2017-10-27 This book explores how low fertility levels could fundamentally change a country's population and society It analyzes the profound effects below average birthrates have on virtually all aspects of society from the economy to religion from marriage to gender roles An introduction written by Dudley L Poston Jr provides a general overview of this relatively new phenomenon that has already impacted nearly one half of the countries of the world today Poston also discusses the broad implications of the changes that these societies are currently experiencing and the ones that they will soon confront Next each of the 12 essays collected in this volume look into how a low fertility level affects a particular demographic or societal structure or process In addition case studies offer an in depth portrait of these changes in the United States and China Coverage includes the dynamics of low and lowest low where the birthrate is well below average fertility high and increasing life expectancies in the United States the implications of native born fertility and other socio demographic changes for less skilled U S immigration ageing and age dependency in post industrial societies good mothering and gender roles in China the increasing prevalence of voluntary childlessness how low fertility and prolonged longevity could result in slow economic growth the decreasing relevance of traditional religious systems and more The emergence and persistence of population decline produced by low fertility levels has the potential to greatly alter key aspects of society as well as individual lives Containing insightful analysis from some of the top minds in demography today this book will arm readers with the knowledge they need to fully understand these transformations

Neighbourhood Policy and the Construction of the European External Borders Filippo Celata, Raffaella Coletti, 2015-06-11 This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries By bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers Is the EU committed to promoting integration in a wider European space or is a fortress Europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation The European Neighbourhood Policy is a controversial strategy where regionalization and bordering homogenisations and differentiations

centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border A specific focus is devoted to the diversity of geo strategies the EU is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players *Integrated Water Resources Management: Concept, Research and Implementation* Dietrich

Borchardt, Janos J. Bogardi, Ralf B. Ibisch, 2016-04-19 This book reviews the concept contemporary research efforts and the implementation of Integrated Water Resources Management IWRM The IWRM concept was established as an international guiding water management paradigm in the early 1990ies and has become a vital approach to solving the problems associated with the topic of water The book summarizes fourteen comprehensive IWRM research projects with worldwide coverage and analyses their motivations settings approaches and implementation of results Aiming to be an up to date interdisciplinary scientific reference this book provides a comprehensive theoretical and empirical analysis of contemporary IWRM research examples of science based implementations and a synthesis of the lessons learnt It concludes with some major future challenges the solving of which will further strengthen the IWRM concept Exploring the Role of

Visualization in Climate Change Communication - an Audience Perspective Anne Gammelgaard Ballantyne, 2018-05-08 Climate change communication is a topical and relevant issue and it is widely acknowledged that public communication about causes impacts and action alternatives is integral to addressing the challenges of the changing climate Climate visualization concerns the communication of climate information and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way of increasing public engagement with climate change In particular developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change Nevertheless there is a lack of research exploring climate visualization from an audience perspective This thesis addresses this gap The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization In addition the thesis discusses the potential contributions and or limitations of climate visualization from a communication perspective Based on a social semiotic theoretical framework this thesis employs focus group interviews to study participants meaning making related to two cases of climate visualization a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes impacts and mitigation alternatives and a web based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for

targeted audiences Nevertheless despite these communicative qualities the analyses also show that participants interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations Although climate visualization can enhance a sense of proximity with climate change the localization of climate risk can also lead to participants downplaying the significance of climate impacts In addition despite the intentions of inducing a sense of agency in both cases of climate visualization participants critically negotiated messages concerning their roles as individuals in mitigating or adapting to climate change and assigned this responsibility onto other actors These findings show that although climate visualization presents certain communicative qualities it is not a panacea for engaging lay audiences with climate change This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication

Kommunikation kring klimat förändringar är ett aktuellt och relevant ämne och många bedömare anser att kommunikation kring orsaker effekter och möjliga alternativ är en viktig del i arbetet med att möta klimatutmaningarna Klimatvisualisering är en process för att skildra klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågorna I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekmän i frågor som rör utsläppsminskningar och klimatanpassning Det är dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv Denna avhandling adresserar denna kunskapslucka Det övergripande syftet är således att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekmän tolkar innebörden av klimatförändringar såsom de representeras i tv exempel på klimatvisualisering Avhandlingen behandlar även klimatvisualiseringens möjliga bidrag och eller begränsningar ur ett kommunikationsperspektiv Med utgångspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomfördes fokusgruppsstudier för att studera deltagarnas meningsskapande i relation till tv exempel på klimatvisualisering en film som visas i en domsteater framtagen för svenska gymnasieelever med möjligheten att uppmuntra till reflektion kring klimatförändringarnas orsaker effekter och alternativ för utsläppsminskning samt ett webbaserat verktyg för klimatanpassning som utvecklats för att stödja hushåll i Norden att anpassa sig till klimatförändringarnas lokala effekter Resultaten av denna avhandling visar att klimatvisualisering kan stödja mottagarna att konkretisera annars abstrakta aspekter av klimatförändringar och att ett lokalt fokus kan för klimatförändringarna att framstå som mer personligt relevanta och intressanta för målgruppen Dock visar analyserna även trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras förförståelse om klimatförändringar som ett globalt och avlägset problem som ska lösas av andra aktörer såsom nationella regeringar eller genom internationella politiska förhandlingar även om klimatvisualisering kan förstås påkänslan av närheten till klimatförändringar kan lokaliseringen av klimatriskerna även leda till att deltagare tonar ned

de lokala klimatriskernas betydelse Dessutom trots att b b da fallen av klimatvisualisering avs g att skapa en k nslas av att kunna p verka blev ansvaret f r klimat t g rder f rem l f r kritisk f rhandling fr n deltagarnas sida de f rlade ansvaret f r att hantera klimatutmaningarna till andra akt rer Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte r n gon patentl sning f r klimatkommunikation Detta understryker ven vikten av att ta h nsyn till kulturella och sociala aspekter av den kommunikativa h ndelsen n r man studerar och utvecklar verktyg f r klimatvisualisering

Radicalized Peter R. Neumann, 2016-09-30 The attacks in Paris in January and November 2015 heralded the beginning of a new wave of terrorism one rooted in the ongoing conflict in Syria and Iraq As ISIS seeks to expand its reach in the Middle East its territory serves as a base for training and operations for a new generation of jihadis Thousands of young people from the West primarily from Europe have travelled to join ISIS re emerging as hardened fighters with military training and a network of international contacts Many of these have now returned to their homelands where it is feared they are planning a new series of brutal attacks Peter R Neumann here explains the phenomenon of the new jihadis and shows why the threat of terrorism in the West is greater than ever before Based on interviews and previously unseen material Neumann provides an essential introduction to one of the greatest crises of our time

India's Emerging Energy Relations Girijesh Pant, 2015-10-09 This book analyzes the role of energy in Indian foreign policy particularly in defining bilateral relations It also focuses on the critical gaps in conceptualizing its formulations and recommends a framework for sustainable energy security India the fourth largest consumer of oil is an energy deficit economy importing more than eighty percent of its needs This makes securing energy integral to its foreign policy goals Obviously it is important for India to actively participate in the global energy market and establish robust enduring and nuanced diplomatic relations with energy exporting countries Equally important is that India diversifies its energy mix and moves towards carbon free growth Renewable energy is today high on the global energy agenda Indian energy policy thus has to address a range of issues domestically and on foreign turf It has to move beyond the transactional mode by creating equity in the global energy industry Today the global energy regime is undergoing fundamental changes as is the power dynamics of the global energy order There are now many new producers and diverse consumers The trade in energy has increased in volume and its direction has shifted from the West to the East and the ongoing structural changes in the energy market call for a new security architecture Given the complex and competitive environment of the new geo economics and geopolitics of energy the question could well be should India frame energy issues in conflict mode or move toward innovative cooperation In either case the message is that India needs an integrated energy security policy

Georgetown Journal of International Affairs, Winter/Spring 2015 Anna Newby, Georgia Pelletier, 2015-03-11 The Georgetown Journal of International Affairs is the official publication of the Edmund A Walsh School of Foreign Service at Georgetown University Each issue of the journal provides readers with a diverse array of timely peer reviewed content penned by top policymakers business leaders and

academic luminaries The Journal takes a holistic approach to international affairs and features a Forum that offers focused analysis on a specific key issue with each new edition of the publication as well as nine regular sections Books Business Economics Conflict Security Culture Society Law Ethics A Look Back Politics Diplomacy Science Technology and View from the Ground **Green Jobs for Sustainable Development** Ana-Maria Boromisa, Sanja Tišma, Anastasya Ležaić, 2015-06-26

A green economy must be built on green jobs the kind of employment that is low carbon intended to reduce energy use and expected to restore environmental quality But attempts to define exactly what a green job is have led to varied and often contradictory answers There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics **DRHA2014 Proceedings / Full Papers**
