**People, Planet and Profit** Samuel O. Idowu, Abubakar S. Kasum, 2016-05-13 It is no longer the case that it is only society which benefits from CSR actions. A corporation actually helps itself when operating sustainably and does well because of its triple bottom line actions. The editors of People Planet and Profit believe that whilst Corporate Social Responsibility is by now a familiar concept to academics or practitioners, insufficient attention has been paid to the end product of CSR in practice which they define in terms of social and economic developmental effect. The contributions in this edited volume explain the developmental aspect of CSR from a conceptual perspective and provide empirical evidence of the impact of CSR delivery on stakeholders in different corners of the World. The emphasis is on what corporations take from and give back to their stakeholders whilst trying to behave in a corporately responsible fashion. Stakeholders including employees, customers, host communities, governments and NGOs have diverse interests and expectations of CSR. This gives rise to questions about whether the activities corporations support are the ones today's stakeholders need, whether the CSR programmes being delivered are adequate and about the relationship between the corporations' view of what constitutes CSR and that of the supposed beneficiaries. This book offers thoughtful answers to these questions and assesses the outcomes of corporate activities both in developed and developing countries and regions in terms of economic progress and social and political advancement.

**Resurgent Resource Nationalism** Mapungubwe Institute for Strategic Reflection (MISTRA), 2016-02-15 The period between 2001 and 2008 saw the longest commodities boom in recent history. Resource rich countries across the world developed more interest in the profits, control and ownership of their natural resources. South Africa which did not benefit much from the boom in commodity prices was nonetheless affected by the emergent resource nationalism trend and it became the focus of the governing party's 2010 National General Council which ultimately resulted in the constitution of a committee to review the country's policy and legislative framework regarding natural wealth beneath the soil. Although the resurgence of resource nationalism is a recent phenomenon, the idea of state intervention in the economy and the extractive sector in particular is not new. Resurgent Resource Nationalism is a qualitative study undertaken by MISTRA for SASOL Ltd that looks at the resurgence of resource nationalism over the past ten years. It discusses the concept of resource nationalism and its manifestation in public policy. It identifies the concerns, drivers and instruments through which resource nationalism is pursued by various mining jurisdictions across regions. It deliberately focuses more on the hydrocarbons sector in order to suit the target audience. The aim is to observe macro trends emerging in various regions.

Notably the study traces the ideational influence of Kautilya and Gandhi in India's overall response to insurgencies. **The End of Accounting and the Path Forward for Investors and Managers** Baruch Lev, Feng Gu, 2016-06-14. An innovative new valuation framework with truly useful economic indicators. The End of Accounting and the Path Forward for Investors and Managers shows how the ubiquitous financial reports have become useless in capital market decisions and lays out an actionable alternative. Based on a comprehensive large sample empirical analysis, this book reports financial documents' continuous deterioration in relevance to investors' decisions. An enlightening discussion details the reasons why accounting is losing relevance in today's market, backed by numerous examples with real world impact. Beyond simply identifying the problem, this report offers a solution: the Value Creation Report, and demonstrates its utility in key industries. New indicators focus on strategy and execution to identify and evaluate a company's true value, creating resources for a more up to date approach to critical investment decision making. While entire industries have come to rely on financial reports for vital information, these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate. This book demonstrates an alternative, giving you a new framework for more informed decision making. Discover a new comprehensive system of economic indicators. Focus on strategic value creating resources in company valuation. Learn how traditional financial documents are quickly losing their utility. Find a path forward with actionable up to date information. Major corporate decisions such as restructuring and M A are predicated on financial indicators of profitability and asset liabilities values. These documents move mountains, so what happens if they're based on faulty indicators that fail to show the true value of the company? The End of Accounting and the Path Forward for Investors and Managers shows you the reality and offers a new blueprint for more accurate valuation.

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille, 2014-08-27. The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic

perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis
