The Triumph of Improvisation James Wilson, 2014-01-21 In *The Triumph of Improvisation*, James Graham Wilson takes a long view of the end of the Cold War from the Soviet invasion of Afghanistan in December 1979 to Operation Desert Storm in January 1991. Drawing on deep archival research and recently declassified papers, Wilson argues that adaptation, improvisation, and engagement by individuals in positions of power ended the specter of a nuclear holocaust. Amid ambivalence and uncertainty, Mikhail Gorbachev, Ronald Reagan, George Shultz, George H. W. Bush, and a host of other actors engaged with adversaries and adapted to a rapidly changing international environment and information age in which global capitalism recovered as command economies failed. Eschewing the notion of a coherent grand strategy to end the Cold War, Wilson paints a vivid portrait of how leaders made choices, some made poor choices while others reacted prudently, imaginatively, and courageously to events they did not foresee. A book about the burdens of responsibility, the obstacles of domestic politics, and the human qualities of leadership, *The Triumph of Improvisation* concludes with a chapter describing how George H. W. Bush oversaw the construction of a new configuration of power after the fall of the Berlin Wall, one that resolved the fundamental components of the Cold War on Washington's terms.

In the Wake of Disaster Ayesha Siddiqi,2019-05-09 What is the state s responsibility to its people in the aftermath of a natural hazard based disaster The book sets out to address this seemingly simple question after large scale floods devastated Pakistan in 2010 and then again in 2011 Along the way it delves into rich detail about people s everyday encounters with the state in Pakistan uncovers postcolonial discourses on rights of citizenship and dispels mainstream understanding of Islamist groups as presenting an alternative development paradigm to the state Based on detailed ethnographic fieldwork In the Wake of the Disaster forces the reader to look beyond narratives of Pakistan as the perennial failing state falling victim to an imminent Islamist takeover The book shifts the conversation from hysteria and sensationalism surrounding Pakistan to the everyday In doing so it

transforms our understanding of contemporary disasters

Rebalancing U.S. Forces Andrew Sven Erickson, Carnes Lord, 2014-05-15 As the U.S. military presence in the Middle East winds down, Asia and the Pacific are receiving increased attention from the American national security community. The Obama administration has announced a rebalancing of the U.S. military posture in the region in reaction primarily to the startling improvement in Chinese air and naval capabilities over the last decade or so. This timely study sets out to assess the implications of this shift for the long-established U.S. military presence in Asia and the Pacific. This presence is anchored in a complex basing infrastructure that scholars and Americans generally too often take for granted. In remedying this state of affairs, this volume offers a detailed survey and analysis of this infrastructure, its history, the political complications it has frequently given rise to and its recent and likely future evolution. American seapower requires a robust constellation of bases to support global power projection. Given the rise of China and the emergence of the Asia Pacific as the center of global economic growth and strategic contention, nowhere is American basing access more important than in this region. Yet manifold political and military challenges, stemming not least of which from rapidly improving Chinese long-range precision strike capabilities, complicate the future of American access and security here. This book addresses what will be needed to maintain the fundamentals of U.S. seapower and force projection in the Asia Pacific and where the key trend lines are headed in that regard. This book demonstrates that U.S. Asia Pacific basing and access is increasingly vital yet increasingly vulnerable. It demands far more attention than the limited coverage it has

received to date and cannot be taken for granted More must be done to preserve capabilities and access upon which American and allied security and prosperity depend *The Contest for the Indian Ocean* Darshana M Baruah, 2024-08-27 A major new examination of the Indian Ocean revealing how the region has become a hotly contested geopolitical flashpoint Throughout history the Indian Ocean has been an essential space for trade commerce and culture Every European power has sought to dominate it Now after a lull in the postwar period control of major shipping routes has once again become a critical aspect of every rising state's ambition to be a global power Darshana M Baruah shows how governments from Washington DC to Nairobi and Canberra are expanding their interests in the region The Indian Ocean is resource rich strategically placed and home to over two billion people Island nations have become more important than ever with Madagascar forming ties with Russia and the Comoros with Saudi Arabia It is also through the region that China engages with Africa and the Middle East This is a compelling account of the geopolitical significance of the Indian Ocean showing how the region has taken centre stage in a new global contest *The Handbook of Communication and Security* Bryan C. Taylor, Hamilton Bean, 2019-06-10 The Handbook of Communication and Security provides a comprehensive collection and synthesis of communication scholarship that engages security at multiple levels including theoretical vs practical international vs domestic and public vs private The handbook includes chapters that leverage communication based concepts and theories to illuminate and influence contemporary security conditions Collectively these chapters foreground and analyze the role of communication in shaping the economic technological and cultural contexts of security in the 21st century This book is ideal for advanced undergraduate and postgraduate students and scholars in the numerous subfields of communication and security studies **Living with Floods in a Mobile Southeast Asia** Carl Middleton, Rebecca Elmhirst, Supang Chantavanich, 2017-11-02 This book contributes to a better understanding of the relationship between migration vulnerability resilience and social justice associated with flooding across diverse environmental social and policy contexts in Southeast Asia It challenges simple analyses of flooding as a singular driver of migration and instead considers the ways in which floods figure in migration based livelihoods and amongst already mobile populations The book develops a conceptual framework based on a mobile political ecology in which particular attention is paid to the multidimensionality temporalities and geographies of vulnerability Rather than simply emphasising the capacities or lack thereof of individuals and households the focus is on identifying factors that instigate manage and perpetuate vulnerable populations and places these include the sociopolitical dynamics of floods flood hazards and risky environments migration and migrant based livelihoods and the policy environments through which all of these take shape The book is organised around a series of eight empirical urban and rural case studies from countries in Southeast Asia where lives are marked by mobility and by floods associated with the region's monsoonal climate The concluding chapter synthesises the insights of the case studies and suggests future policy directions Together the chapters highlight critical policy questions around the governance of migration institutionalised
