This book explains how and why using a critical political economic perspective and focusing on the case of Ireland Throughout Ireland is compared with contemporary and historical examples to contextualise the arguments made The book covers the housing bubble that led to the crash the rescue of financial institutions by the state the role of the European institutions and the International Monetary Fund austerity and the possibility of leaving the eurozone for Europe's peripheral countries Through a systematic analysis of Ireland's main newspapers it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis Policy Choices, Dilemmas and Risks in the ICC's Iraq-UK Preliminary Examination Thomas Obel Hansen, 2017-11-08 **Economics of the 1%** John Weeks, 2014-01-20 How much do economists really know In most cases they claim to have profound knowledge but in fact understand little and obscure almost everything Most people are convinced that economics should be left to the experts when they themselves are perfectly capable of understanding it This book explains that mainstream economics serves the interests of the rich through its logical inconsistency and unabashedly reactionary conclusions John F Weeks exposes the myths of mainstream economics and explains in straightforward language why current policies fail to serve the vast majority of people in the United States Europe and elsewhere Their failure to serve the interests of the many results from their devoted service to the few The Trade-Development Nexus in the European Union Maurizio Carbone, Jan Orbie, 2016-03-22 This volume offers new

perspectives on the evolution of the trade development nexus in the European Union against dramatic changes in the international context Without disregarding them it seeks to go beyond the controversial and extensively researched Economic Partnership Agreements EPAs In particular it focuses on the reform of the Generalised System of Preferences the negotiation of various Preferential Trade Agreements the application of trade sanctions the allegedly ambitious agendas on decent work Aid for Trade and aid untying and the implications of the changing balance of power in global economic relations Taking diverse approaches and at times reaching different conclusions contributors directly or indirectly address one or more of the three general themes of the book differentiation coherence and norms This book was published as a special issue of Contemporary Politics Negotiating Public Services in the Congo Tom De Herdt, Kristof Titeca, 2019-06-15 The Democratic Republic of Congo DRC has been widely derided as a failed state unable to meet the basic needs of its citizens But while state infrastructure continues to decay many essential services continue to be provided at the local level often through grassroots initiatives So while for example state funding for education is almost non existent average school enrolment remains well above average for Sub Saharan Africa This book addresses this paradox bringing together key scholars working on public services in the DRC to elucidate the evolving nature of governance in developing countries Its contributions encompass a wide range of public services including education justice transport and health Taking stock of what functions and why it contributes to the debate on public services in the context of real or hybrid governance beyond the state does the state still have a function or is it no longer useful and relevant Crucially how does international aid help or complicate this picture Rich in empirical detail the contributors provide a valuable work for students and scholars interested in the role played by non state actors in organizing statehood a role too often neglected in debates on post conflict reconstruction **The War Lawyers** Craig Jones, 2020-11-26 Over the last 20 years the world's most advanced militaries have invited a small number of military legal professionals into the heart of their targeting operations spaces which had previously been exclusively for generals and commanders These professionals trained and hired to give legal advice on an array of military operations have become known as war lawyers The War Lawyers examines the laws of war as applied by military lawyers to aerial targeting operations carried out by the US military in Iraq and Afghanistan and the Israel military in Gaza Drawing on interviews with military lawyers and others this book explains why some lawyers became integrated in the chain of command whereby military targets are identified and attacked whether by manned aircraft drones and or ground forces and with what results This book shows just how important law and military lawyers have become in the conduct of contemporary warfare and how it is understood Jones argues that circulations of law and policy between the US and Israel have bolstered targeting practices considered legally questionable contending that the involvement of war lawyers in targeting operations enables legitimises and sometimes even extends military violence Forestry and Water Conservation in South Africa Brett Bennett, Fred Kruger, 2015-11-11 This innovative interdisciplinary study focuses on the history science

and policy of tree planting and water conservation in South Africa South Africa's forestry sector has sat often controversially at the crossroads of policy and scientific debates regarding water conservation economic development and biodiversity protection Bennett and Kruger show how debates about the hydrological impact of exotic tree planting in South Africa shaped the development of modern scientific ideas and state policies relating to timber plantations water conservation invasive species control and biodiversity management within South Africa as well as elsewhere in the world Forestry and Water Conservation in South Africa shows how scientific research on the impact of exotic and native vegetation led to the development of a comprehensive national policy for conserving water producing timber and protecting indigenous species from invasive alien plants Policies and laws relating to forests and water began to change in the late 1980s and early 1990s as a result of political and administrative changes within South Africa This book suggests that the country's contemporary policies towards timber plantations guided by the National Water Act of 1998 need to be reconsidered in light of the authors findings Bennett and Kruger also call for more interdisciplinary research and greater emphasis on integrated policies and management plans for forestry invasive alien plants water conservation and biodiversity preservation Company Disclosure in the Digital Age Gill North, 2015-10-16 Effective corporate reporting and disclosure are critical in financial markets to promote vigorous competition optimal performance and transparency This book examines whether existing disclosure frameworks in eight countries with the world's most significant securities exchanges achieve these objectives and then drawing on extensive empirical findings identifies the policies and practices that contribute most to improving the overall quality of listed company reporting and communication Contending that public disclosure of listed company information is an essential precondition to the long term efficient operation of financial markets the book provides analysis of such issues and topics as the following arguments for and against mandatory disclosure regimes key principles of periodic and continuous disclosure regulation tensions between direct and indirect investment in financial markets assumptions concerning the need to maintain a privileged role for financial intermediaries intermediary analyst and research incentives protection of individual investors selective disclosure disclosure of bad news the role of accounting standards public access to company briefings long term performance reporting and analysis and company reporting developments A significant portion of the book provides an overview of disclosure regulation and practice in the United States Canada Germany the United Kingdom Japan Hong Kong Australia and Singapore A highly informative survey looks at company reports disclosures and websites of large listed companies including Microsoft Citigroup Teck Resources Deutsche Bank BP Sony PetroChina Company BHP Billiton and Singapore Telecommunications The book discusses common disclosure issues that arise across jurisdictions provides valuable insights on the efficacy of existing disclosure regulation and practice and highlights the important principles processes and practices that underpin best practice company disclosure frameworks It will be welcomed by company boards and executives and their counsel as well as by policymakers and scholars in the areas

Cooper, Hany Besada, 2016-04-15 Today s era of intense globalization has unleashed dynamic movements of people pathogens and pests that overwhelm the static territorial jurisdictions on which the governance provided by sovereign states and their formal intergovernmental institutions is based This world of movement calls for new ideas and institutions to govern people s health above all in Africa where the movements and health challenges are the most acute This book insightfully explores these challenges in ways that put the perspectives of Africans themselves at centre stage It begins with the long central and still compelling African health challenge of combating the pandemic of HIV AIDS It then examines the global governance responses by the major multilateral organizations of the World Bank and the World Trade Organization and the newer

informal flexible democratically oriented ones of the Group of Eight It also addresses the compounding health challenge created by climate change to assess both its intensifying impact on Africa and how all international institutions have largely failed to link climate and health in their governance response It concludes with several recommendations about the innovative ideas and institutions that offer a way to closing the great global governance gaps and thus improving Africans health and that of citizens beyond Competition Law Richard Whish, David Bailey, 2015 Definitive and clear authoritative and comprehensive the stand alone resource on competition law for students and practitioners written by the leading academics in the field This eighth edition addresses key developments including the Enterprise and Regulatory Reform Act 2013 with an increased emphasis on intellectual property The Kurdish Question Revisited Gareth Stansfield, Mohammed Shareef, 2017-08-15 The Kurds once marginal in the study of the Middle East and secondary in its international relations have moved to centre stage in recent years The contributors to The Kurdish Question Revisited offer insights into how this once seemingly intractable immutable phenomenon is being transformed amid the new political realities of the Middle East
