

(One hour and a half)

Answers to this Paper must be written on the paper provided separately.

You will **not** be allowed to write during the first 15 minutes.

This time is to be spent in reading the Question Paper.

The time given at the head of this Paper is the time allowed for writing the answers.

Attempt **all** questions from **Section I** and **any four** questions from **Section II**.

The intended marks for questions or parts of questions are given in brackets [].

SECTION-I (40 Marks)

(Attempt **all** questions from this Section.)

Question 1.

(a) Name the following :

- (i) The part of the brain associated with memory.
- (ii) The ear ossicle which is attached to the tympanum.
- (iii) The type of gene, which in the presence of a contrasting allele is not expressed.
- (iv) The hormone secreted by islets of langerhans.
- (v) The process of conversion of ADP into ATP during photosynthesis. [5]

(b) State the main function of the following :

- (i) Cerebrospinal fluid.
- (ii) Eustachian tube.
- (iii) Suspensory ligament of the eye.
- (iv) Sperm duct.
- (v) Lenticels. [5]

(c) Copy and complete the following by filling in the blanks 1 to 5 with appropriate words :

The human female gonads are ovaries. A maturing egg in the ovary is present in a sac of cells called (1). As the egg grows larger, the follicle enlarges and gets filled with a fluid and is now called the (2) follicle. The process of releasing the egg from the ovary is called (3). The ovum is picked up by the oviducal funnel and fertilization takes place in the (4). In about a week the blastocyst gets fixed in the endometrium of the uterus and this process is called (5).

(d) Given below are six sets with four terms each. In each set one term is odd and cannot be grouped in the same category to which the other three belong. Identify the odd one in each set and name the category to which the remaining three belong. The first one has been done as an example.

Example : Calyx, Corolla, Stamens, Midrib

Odd term : midrib

Category : parts of a flower.

Question Paper On Biology In Waec 2014

Theresa Bourke,Reece Mills,Rod Lane

Question Paper On Biology In Waec 2014:

Handbook of Research on the Role of Human Factors in IT Project Management Misra, Sanjay, Adewumi, Adewole, 2019-09-27 The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

Assessment in Geographical Education: An International Perspective Theresa Bourke, Reece Mills, Rod Lane, 2022-02-27 In recent years, there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders, including students, teachers, parents, and policymakers. To be effective, assessment needs to be valid, reliable, and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators, it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit-for-purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher-educator scholars from across Australia, USA, South Korea, Germany, Switzerland, and Singapore. What unifies the work in this book is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student knowledge and skills.
