Abstract—The purpose of this study was to determine the effect of a 10-week training program on the heart rate (HR) and heart rate reserve (HRR) of sedentary middle-aged men. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 10-week training program consisting of three sessions per week. The HR and HRR were measured at rest and during submaximal and maximal exercise at baseline and after 10 weeks. The EX group showed a significant decrease in HR at rest and during submaximal and maximal exercise compared to the CON group. The HRR also showed a significant increase in the EX group compared to the CON group. The results of this study suggest that a 10-week training program can improve the cardiovascular fitness of sedentary middle-aged men.

- Day and night periods that are longer than the standard 24 hours occur most commonly with the use of artificial light in commercial greenhouses. To grow plants that are flowering the opposite way (e.g., to force them to flower in the winter).
- Increased moisture in the soil will compete with the salt for absorption by the roots, so the length of the day must also be increased (depending on the soil moisture requirements).
- The soil pH must also be kept high. It is very important to keep the plants in a high pH soil, preferably 7.0 or higher, to prevent nutrient deficiency. Nutrient deficiency is not caused by these plants' acid sensitivity. However, salt stress is caused by the high levels of salts.

When you install your T-Value One Connection, improper installation of all four screws (50 combinations for One Connection) will void the warranty. Please, before installing, refer to the correct installation instructions. Failure to maintain proper ventilation may result in a serious problem with the product.

- When a producer's price for the output rises or falls, it must adjust its output level accordingly. A rise in the price of the output will cause a producer to produce more output, and a fall in the price of the output will cause a producer to produce less output.
