Noun Classes in the Grassfields Bantu Borderland Larry M. Hyman, 1980

Analogical classification in formal grammar Matías Guzmán Naranjo, 2019 The organization of the lexicon and especially the relations between groups of lexemes is a strongly debated topic in linguistics Some authors have insisted on the lack of any structure of the lexicon In this vein Di Sciullo Skousen 1989 Eddington 1996 This approach often

called analogical has developed highly accurate computational and non computational models that can predict the classes to which lexemes belong Like the organization of lexemes in type hierarchies analogical relations between items help speakers to make sense of intricate systems and reduce apparent complexity K pcke Zubin 1984 Despite this core commonality and despite the fact that most linguists seem to agree that analogy plays an important role in language there has been remarkably little work on bringing together these two approaches Formal grammar traditions have been very successful in capturing grammatical behaviour but in the process have downplayed the role analogy plays in linguistics Anderson 2015 In this work I aim to change this state of affairs First by providing an explicit formalization of how analogy interacts with grammar and second by showing that analogical effects and relations closely mirror the structures in the lexicon I will show that both formal grammar approaches and usage based analogical models capture mutually compatible relations in the lexicon

From Sub-Lexical to Discourse-Level Effects in Bi- And Multilingual Language Processing Katarzyna Dziubalska-Kolaczyk,Monika M. Polczynska, Katarzyna Jankowiak,2025-02-14 With the majority of the world population speaking more than one language cross language interactions associated with bi and multilingual language processing have recently received much scholarly attention While we know from psycholinguistic research that multilingualism modulates cognitive mechanisms of language processing previous studies have concentrated selectively on specific aspects and or stages of language processing with little cross disciplinary insight into multilingualism This contribution aims to systematize our knowledge of multilingual language processing by providing a comprehensive overview of the effects observed at the level of sub lexical orthographic and phonological lexico semantic and discourse processing Further since comprehensive studies of multilingualism require other areas of research e g psychology sociology and linguistics the present volume will bring together multiple fields methods and perspectives to provide a cross disciplinary
