November 2013 Paper 3 A Level Economics Zimsec:

Beyond the Crises: Zimbabwe's Prospects for Transformation Tendai Murisa, Tendai Chikweche, 2015-12-01 Over the past years few African countries have been the focus of discussions and analyses generating a vast array of literature as much as Zimbabwe. The socioeconomic and political crises since the turn of the century have deeply transformed the country from the ideals of a vibrant freshly independent nation just two decades earlier. These transformations have necessitated the call for the restructuring of Zimbabwean society, polity and economy. But this literature remains exclusively within the realm of academic thinking and theorising with no concerted effort to move beyond this by explicitly drawing out the policy implications. Beyond the Crises: Zimbabwe's Prospects for Transformation is a welcome addition to the academic and policy literature with a much broader and all embracing focus in terms of policy interventions. By focusing on different aspects of social and economic justice, Murisa and Chikweche go beyond initiating a broad discussion on these two key pillars of human development with a view to suggesting possible future directions of practical solutions and policy development for the attainment of inclusive social and economic justice for Zimbabweans.

The Cost of Free Money Paola Subacchi, 2020-09-15 A penetrating account of how unchecked capital mobility is damaging international cooperation, polarizing the economic landscape and ultimately reshaping the global order. When it comes to the afflictions of the global economy, almost everyone and especially Donald Trump is quick to point the finger of blame at the state of international trade. But what about unconstrained capital flows? Unfettered capital has resulted in a string of financial and economic crises that have left our political systems strained and dialogue corroded. The once perceived benefits of openness have been cast to the wayside and the cracks in the global order can no longer be ignored. Paola Subacchi argues that international cooperation and interdependence have become crippled. Regional restrictions will soon strengthen and a multipolar order will take shape, leading to a distinctly transformed economic landscape in which China challenges the dominance of the US dollar. Combining history, analysis and prediction, this book provides penetrating insight into the challenges facing the international economic order.

Inequality and Political Cleavage in Africa Catherine Boone, 2024-04-25 Extensive data maps and case histories show how competition between rich and poor regions drives African politics, not ethnic diversity.

Poverty and Development in China Caizhen Lu,2013-03-01 China has made huge economic strides in recent decades but poverty is still a major issue on the agenda for rural China Poverty and Development in China analyses how poverty is recognized and measured and how people in poverty are identified literally asking who is poor in China Lu Caizhen s research compares four approaches to poverty assessment China s official poverty identification method the participatory approach to poverty assessment the monetary approach and use of multidimensional poverty indicators Each of these is applied to the same population of households to identify the poor in rural Wuding County Yunnan Province The analysis shows that there is in fact very little overlap of households identified as poor by the various means and that choice of approach does matter in the outcome of who is identified as poor This has implications at the theoretical methodological and policy levels Lu discusses these in detail concluding that at present there is a need to shift away from poverty reduction strategies that narrowly emphasize income generation activities as these are often short term efforts Instead the focus should move towards a broader combination of short term and long term strategies to break poverty s inter linked structural causes
