Stewart, 2021-10-25 Freedom of overflight is in large part uncontroversial However several recent international disputes and subsequent scrutiny of the exercise of coastal State jurisdiction in international airspace have highlighted the problematic legal nature of this freedom namely how a State's creeping jurisdiction may encroach upon the rights of other States This groundbreaking book examines in depth the ambiguous areas at the nexus of air law and the law of the sea with respect to the balance between coastal State jurisdiction and freedom of overflight thus providing greater legal certainty regarding State actions involving overflight in international airspace The author identifies and thoroughly examines three highly salient matters impacting overflight in international waters the right of a State to establish safety zones around maritime constructions and the legitimacy of extending these safety zones to the airspace what if anything under international civil aviation law specifically prohibits a State from discriminating against the aircraft of another State in international airspace within its flight information region and whether air defence identification zones can be justified as customary international law Also considered is the law of the sea concerning transit passage through international straits and archipelagic sea lanes as applied to airspace users This is the

first detailed study of overflight to combine the perspectives of international civil aviation law and the law of the sea As such it presents a comprehensive analysis of the legality of attempts by coastal States to exercise jurisdiction in international airspace over aircraft registered in other States thus taking a giant step towards determining what freedom of overflight entails by establishing its legitimate limitations It will be welcomed by practitioners policymakers and academics concerned with international transportation national defence international trade and other areas of international law Awakening to China's Rise Hugo Meijer,2022-08-01 Awakening to China's Rise provides the most comprehensive analysis to date of how Europe's major powers have responded to the re emergence of China as a great power in world politics since the end of the Cold War To do so it puts forward a unique cross regional comparison of how the major European powers France Germany and the United Kingdom have confronted Chinese assertiveness both in the Asia Pacific and in Europe Firstly it analyses their response to China's increasingly muscular regional posture in the Asia Pacific through the development of diplomatic and security initiatives with partners in the region Secondly it delineates how they have confronted China's inroads into Europe looking at the measures that they have taken to tackle Chinese investments in and supply of technologies in strategic sectors such as critical national infrastructures dual use technologies and in the digital domain including Huawei's 5G networks A longstanding assumption in the IR literature has been that European foreign policies toward the People's Republic of China have been driven by a naive and self interested focus on the economic opportunities presented by such a vast market overlooking security considerations This book challenges such common belief through a detailed examination of the policies of France Germany and the United Kingdom from 1989 to the present Its central argument is that whereas this assessment aptly characterized the first two post Cold War decades Beijing's growing assertiveness after 2009 caused the three major European powers to awaken to China's rise In the 2010s heightened threat perceptions of China coupled with increasingly competitive bilateral economic relations with the PRC have gradually and cumulatively caused the hardening of their policy goals which in turn translated into the formulation of new policy instruments to confront such a challenge To substantiate this argument the book relies on a large body of previously undisclosed primary sources including 223 interviews conducted with senior officials in Europe Berlin Brussels London Paris in the United States Washington DC and in Asia Beijing Shanghai New Delhi Seoul declassified archival documents from France the UK and Germany leaked US diplomatic cables and new data on European naval deployments , *Asia's Reckoning* Richard McGregor,2018-12-04 A Financial Times Best Book of 2017 A shrewd and knowing book Robert D Kaplan The Wall Street Journal A compelling and impressive read The Economist Skillfully crafted and well argued Jeffrey Wasserstrom Financial Times An excellent modern history provides the context needed to make sense of the region's present and future Joyce Lau South China Morning Post A history of the combative military diplomatic and economic relations among China Japan and the United States since the 1970s and the potential crisis that awaits them Richard McGregor's *Asia's Reckoning* is a compelling account of the widening geopolitical

cracks in a region that has flourished under an American security umbrella for more than half a century. The toxic rivalry between China and Japan, two Asian giants consumed with endless history wars and ruled by entrenched political dynasties, is threatening to upend the peace underwritten by Pax Americana since World War II. Combined with Donald Trump's disdain for America's old alliances and China's own regional ambitions, east Asia is entering a new era of instability and conflict. If the United States laid the postwar foundations for modern Asia, now the anchor of the global economy, Asia's Reckoning reveals how that structure is falling apart. With unrivaled access to archives in the United States and Asia, as well as to many of the major players in all three countries, Richard McGregor has written a tale that blends the tectonic shifts in diplomacy with bitter domestic politics and the personalities driving them. It is a story not only of an overstretched America but also of the rise and fall and rise of the great powers of Asia. The about turn of Japan from a colossus seemingly poised for world domination to a nation in inexorable decline in the space of two decades has few parallels in modern history, as does the rapid rise of China, a country whose military is now larger than those of Japan, South Korea, Taiwan, and southeast Asia's combined. The confrontational course on which China and Japan are set is no simple spat between neighbors; the United States would be involved on the side of Japan in any military conflict between the two countries. The fallout would be an economic tsunami affecting manufacturing centers, trade routes, and political capitals on every continent. Richard McGregor's book takes us behind the headlines of his years reporting as the Financial Times's Beijing and Washington bureau chief to show how American power will stand or fall on its ability to hold its ground in Asia.

British Naval Intelligence through the Twentieth Century Andrew Boyd, 2020-08-30. This is the first comprehensive account of how intelligence influenced and sustained British naval power from the mid-nineteenth century, when the Admiralty first created a dedicated intelligence department, through to the end of the Cold War. It brings a critical new dimension to our understanding of British naval history in this period, while setting naval intelligence in a wider context and emphasising the many parts of

the British state that contributed to naval requirements It is also a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today and the concepts and values that underpin it The author explains why and how intelligence was collected and assesses its real impact on policy and operations It confirms that naval intelligence was critical to Britain's survival and ultimate victory in the two World Wars but significantly reappraises its role highlighting the importance of communications intelligence to an effective blockade in the First and according Ultra less dominance compared to other sources in the Second It reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested and while British power declined rapidly after 1945 the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the twentieth century and in submarine warfare especially in the second half of the Cold War to achieve influence and impact for Britain far exceeding resources expended This compelling new history will have wide appeal to all readers interested in intelligence and its crucial impact on naval policy and operations

Reporting World War II G. Kurt Piehler, Ingo Tauschweizer, 2023-04-25 This set of essays offers new insights into the journalistic process and the pressures American front line reporters experienced covering World War II Transmitting stories through cable or couriers remained expensive and often required the cooperation of foreign governments and the American armed forces Initially reporters from a neutral America documented the early victories by Nazi Germany and the Soviet invasion of Finland Not all journalists strove for objectivity During her time reporting from Ireland Helen Kirkpatrick remained a fierce critic of that country's neutrality Once the United States joined the fight after the Japanese attack on Pearl Harbor American journalists supported the struggle against the Axis powers but this volume will show that reporters even when members of the army sponsored newspaper Stars and Stripes were not mere ciphers of the official line African American reporters Roi Ottley and Ollie Stewart worked to bolster the morale of Black GIs and undermined the institutional racism endemic to the American war effort Women front line reporters are given their due in this volume examining the struggles to overcome gender bias by describing triumphs of Th r se Mabel Bonney Iris Carpenter Lee Carson and Anne Stringer The line between public relations and journalism could be a fine one as reflected by the U S Marine Corps creating its own network of Marine correspondents who reported on the Pacific island campaigns and had their work published by American media outlets Despite the pressures of censorship the best American reporters strove for accuracy in reporting the facts even when dependent on official communiqu s issued by the military Many wartime reporters even when covering major turning points sought to embrace a reporting style that recorded the experiences of average soldiers Often associated with Ernie Pyle and Bill Mauldin the embrace of the human interest story served as one of the enduring legacies of the conflict Despite the importance of American war reporting in shaping perceptions of the war on the home front as well as shaping the historical narrative of the conflict this work underscores how there is more to learn Readers will gain from this work a new appreciation of the

decades of climate policy have affluent democracies made so little progress in cutting greenhouse gas emissions We know that there are ways of doing this that are both practical and affordable It is politics that is the problem Stringent climate policies may lead companies to redirect investment elsewhere or lead voters to retaliate at the ballot box There are many political obstacles to stronger action What can be done Based on an analysis of the logic of policy making plus observation of recent developments in climate politics this book identifies a broad range of political strategies that are available to governments that wish to take more effective action against climate change while avoiding serious political damage Separate chapters deal with strategies relating to unilateral action persuasion political exchange and changing the terms of political exchange This is the first book length study of political strategy and climate change and will be of interest not only to policymakers but also to experts and activists looking to formulate politically realistic policy proposals and scholars and students of politics and environmental studies 清华大学出版社,2021-11-30 2021 5 2020 2010 3000 IBM Andrew Whitby NESTA NESTA yifang chou icloud com
