The University of Phoenix is Americas largest accredited private University with over 180 campuses in 35 states nationwide. The University of Phoenix offers a host of undergraduate programs for the working adult. The program that interests me the most is the Bachelor of Science in Information Technology (BSIT). "The BSIT program is focused on the acquisition of theory and technical competencies associated with the information technology profession". The program is setup as such where full time professionals have the opportunity to attend school while tending to the needs of a growing family.

By assigning both group and individual assignments, the programs focus is to provide a unique learning style that is both academic and practical to real life work experiences. This is a distinctive approach to learning and is a different style from that of a traditional University. I was drawn to the University because of this distinctive approach and it is one of the aspects that intrigued me about the program. I started at the University of Phoenix in January 2004, and have not since regretted a minute of that decision. Becoming a student in the BSIT program has already proven to be an invaluable experience. I have since applied acquired knowledge from the programs course work to tasks encountered in the job field. My current position as a Maintenance Technician in the Semiconductor Industry requires me to troubleshoot hardware and software failures.

This assignment is broken up into three parts, first I will reflect upon where I was in my personal and professional life before I started the BSIT program. Next I will evaluate the growth I have experienced during my University of Phoenix program of study. Lastly I will analyze the impact of completing the University of Phoenix Bachelor's program and my current and future professional goals I have established for myself.

Those who made the choice to obtain higher education did so as a personal decision for themselves, more power to those individuals. I knew that the chances to make more money would likely be in my favor and the probability to advance to a higher position is almost guaranteed in some cases. These two benefits and more could be obtained by earning a college degree. I have read studies reporting that people who had a college degree are more likely to be happier with their job responsibilities and more committed to their roles as an employee of the company. "The average family income for people who had only a high school diploma was \$52k a year verse the family income of people who had a college (bachelor's) degree was \$96k".

The prospect for me to aspire a college education was never a misconception, nor was it a question of the lack of finances available. In fact, I supported my wife as she earned her Bachelors Degree in Case Management at Arizona State University. She began her studies right out of high school while...
