Past Question For Civic Education 2013

Gary J. Schmitt

Past Question For Civic Education 2013:

The Politics of Civic Education Eleni M. Mantas-Kourounis, 2024-06-10 This book chronicles the progression of civic education advocacy since the early 2000s. It identifies the main actors that called for civic education reform, describes their motivations and policy platforms, and documents the path taken to capture state policy agendas. It argues that No Child Left Behind incentivized civic education advocates to mobilize a call to action to restore emphasis on civics that materialized into national policy reform proposals that successfully captured the agendas of state legislatures and bureaucracies. This book analyzes the implementation and sustainability of these civic education policy reforms by undertaking a comparative case study analysis of school districts in Utah and Connecticut. Through the voices of teachers and district administrators, the book tells the story of what happened when these state policy reforms inspired by national initiatives hit the local level where the rubber meets the road. As ideological debates about schools and democracy unfold across the country, as civic education advocates and proposals proliferate, this book treats civic education not as a panacea but as a concrete policy area to be analyzed and understood. It contextualizes the current debate and offers a critical assessment of the most recent comprehensive state level civic education policy reform. It argues that while questions linger about what type of civic inspired educational interventions remains most effective for whom, where and why the implementation of such interventions are profoundly impacted by local actors and local politics, and that future initiatives should take this dimension into consideration.

Democracy's Education Harry C. Boyte, 2021-04-30 Today Americans feel powerless in the face of problems on every front. Such feelings are acute in higher education where educators are experiencing an avalanche of changes: cost cutting, new technologies, and demands that higher education be narrowly geared to the needs of today's workplace. College graduates face mounting debt and uncertain job prospects and worry about a coarsening of the mass culture and the erosion of authentic human relationships. Higher education is increasingly seen and often portrays itself as a ticket to individual success, a private good, not a public one. *Democracy's Education* grows from the American Commonwealth Partnership, a year-long project to revitalize the democratic narrative of higher education that began with an invitation to Harry Boyte from the White House to put together a coalition aimed at strengthening higher education as a public good. The project was launched at the beginning of 2012 to mark the 150th anniversary of the Morrill Act, which created land grant colleges. Beginning with an essay by Harry C. Boyte, *Reinventing Citizenship as Public Work*, which challenges educators and their partners to claim their power to shape the story of higher education and the civic careers of students, the collection brings world famous scholars, senior government officials, and university presidents together with faculty, students, staff, community organizers, and intellectuals from across the United States and South Africa and Japan. Contributors describe many constructive responses to change already taking place in different kinds of institutions and present cutting edge ideas like civic science, civic studies, citizen professionalism, and citizen alumni. Authors detail practical approaches to making change from new faculty and

student roles to changes in curriculum and student life and strategies for everyday citizen empowerment Overall the work develops a democratic story of education urgently needed to address today s challenges from climate change to growing inequality

Human Rights Literacies Cornelia Roux, Anne Becker, 2018-12-29 This book adds impetus to the nexus between human rights human rights education and material reality The dissonance between these aspects is of growing concern for most human rights educators in various social contexts The first part of the book opens up new discourses and presents new ontologies and epistemologies from scholars in human rights human rights education and human rights literacies to critique and or justify the understandings of human rights complex applications Today s rapidly changing social contexts and new languages attempting to understand ongoing dehumanization and violations put enormous pressure on higher education educators individuals working in social sciences policy makers and scholars engaged in curricula making The second part demonstrates how global interactions between citizens from different countries with diverse understandings of human rights from developed and developing democracies question the link between human rights and its exclusive Western philosophies Continuing inhumane actions around the globe reflect the failure of human rights law and human rights education in schools higher education and society at large The book shows that human rights education is no longer a blueprint for understanding human rights and its universal or contextual values presented for multicomplex societies The final chapters argue for new ontologies and epistemologies of human rights human rights education and human rights literacies to open up difficult conversations and to give space to dissonant and disruptive discourses The many opportunities for human rights education and literacies lies in these conversations

The Professions and Civic Life Gary J. Schmitt, 2016-06-10 Professions are institutions which through their small size self governing elements and sense of social mission can assist in maintaining a sound civic culture As mediating institutions in our democratic society that are neither entirely birthed by the state nor are entirely private the individual professions such as the legal and education professions journalism economics architecture or the military arguably present practical avenues through which to teach civic behavior and to restore Americans broken trust This volume on the professions and civic life undertakes a unique and timely examination of twelve individual professions to see how each affects the character of American citizenship and the civic culture of the nation through their practices and ethos Among the questions each essay in the volume addresses are What is distinctive or not about the specific profession as it came to be practiced in the United States Given the specialized knowledge training and sometimes licensing of a profession what do the professions perceive to be their role in promoting the larger common good How can we bring professionals expert knowledge to bear on social problems in an open and deliberative way Is the ethic of a particular profession as it understands itself today at odds with the American conception of self government and a healthy civic life Through analysis of these questions each chapter presents a rich treatment of how the twelve longstanding professions of political science teaching the law the military economics medicine journalism

literature science architecture music and history help support and challenge the general public's civic behavior in general and their attachment to the American regime in particular
