local area network LAN or intranet there are many pieces of hardware trying to gain access to the network transmission media at the same time i.e. phone lines coax wireless etc However a network cable or wireless transmission frequency can physically only allow one node to use it at a given time Therefore there must be some way to regulate which node has control of the medium a media access control or MAC protocol Ethernet is a MAC protocol it is one way to regulate physical access to network transmission media Ethernet networking is used primarily by networks that are contained within a single physical location If you need to design install and manage a network in such an environment i.e. home or small business office then
