Clean Disruption of Energy and Transportation Tony Seba,2014-06-27 The industrial age of energy and transportation will be over by 2030 Maybe before Exponentially improving technologies such as solar electric vehicles and autonomous self driving cars will disrupt and sweep away the energy and transportation industries as we know it The same Silicon Valley ecosystem that created bit based technologies that have disrupted atom based industries is now creating bit and electron based technologies that will disrupt atom based energy industries Clean Disruption projections based on technology cost curves business model innovation as well as product innovation show that by 2030 All new energy will be provided by solar or wind All new mass market vehicles will be electric All of these vehicles will be autonomous self driving or semi autonomous The new car market will shrink by 80% Even assuming that EVs don t kill the gasoline car by 2030 the self driving car will shrink the new car market by 80% Gasoline will be obsolete Nuclear is already obsolete Up to 80% of highways will be redundant Up to 80% of parking spaces will be redundant The concept of individual car ownership will be obsolete The Car Insurance industry will be disrupted The Stone Age did not end because we ran out of rocks It ended because a disruptive technology ushered in the Bronze Age The era of centralized command and control extraction resource based energy sources oil gas coal and nuclear will not end because we run out of petroleum natural gas coal or uranium It will end because these energy sources the business models they employ and the products that sustain them will be disrupted by superior technologies product architectures and business models This is a technology based disruption reminiscent of how the cell phone Internet and personal computer swept away industries such as landline telephony publishing and mainframe computers Just like those technology disruptions flipped the architecture of information and brought abundant cheap and participatory information the clean disruption will flip the architecture of energy and bring abundant cheap and participatory energy Just like those previous technology disruptions the Clean Disruption is inevitable and it will be swift Samsung Rising Geoffrey Cain,2020-03-17 An explosive expose of Samsung that reads like a dynastic thriller rolling through three generations of family intrigue embezzlement bribery corruption prostitution and other bad behavior The Wall Street Journal LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD Based on years of reporting on Samsung for The Economist The Wall Street Journal and Time from his base in South Korea and his countless sources inside and outside the company Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows Seen for decades in tech circles as a fast follower rather than an innovation leader Samsung today

has grown to become a market leader in the United States and around the globe They have captured one quarter of the smartphone market and have been pushing the envelope on every front Forty years ago Samsung was a rickety Korean agricultural conglomerate that produced sugar paper and fertilizer located in a backward country with a third world economy With the rise of the PC revolution though Chairman Lee Byung chul began a bold experiment to make Samsung a major supplier of computer chips The multimillion dollar plan was incredibly risky But Lee wowed by a young Steve Jobs who sat down with the chairman to offer his advice became obsessed with creating a tech empire And in Samsung Rising we follow Samsung behind the scenes as the company fights its way to the top of tech It is one of Apple s chief suppliers of technology critical to the iPhone and its own Galaxy phone outsells the iPhone Today Samsung employs over 300 000 people compared to Apple s 80 000 and Google s 48 000 The company s revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea s exports Yet their disastrous recall of the Galaxy Note 7 with numerous reports of phones spontaneously bursting into flames reveals the dangers of the company s headlong attempt to overtake Apple at any cost A sweeping insider account Samsung Rising shows how a determined and fearless Asian competitor has become a force to be reckoned with *The Times Index*, 2011 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement
