Simply put, medium format photography is quite a bit more complex than shooting with 35mm film SLRs or 35mm style DSLRs. It takes a bit more skill and experience to handle medium format cameras. Not only do you need to learn to think differently about how you shoot, but you also have a whole new type of equipment to learn. Medium format cameras produce bigger images which allows for more detail and greater enlargement. And because they in general were designed for professional photographers, the lenses tend to be of better quality than most 35mm lenses, which also adds to the detail in the images. In this book, we'll take a look at medium format SLRs and TLRs, and we'll even touch upon some other types. We'll also consider a few lenses, although these are largely a matter of choice. And there are far fewer choices for medium format cameras than for other types. Time to do some weight training and heft those medium format cameras and lenses into position. Let's go. CLANDESTINE PHOTOGRAPHY Raymond P. Siljander, Lance W.

Readers will discover esoteric techniques for photographically recording recognizable human and vehicle plate images from distances of over a mile in both daylight and night conditions. Myriad methods for secretly photographing people and property under diverse and difficult conditions are presented. Readers will discover innovative applications of combinations of old and new photographic related technologies, some combined in unexpected ways that produce surprising results. It is written and extremely well illustrated in an easy-to-understand style for all photographers regardless of skill level.
