BEFORE USING THE CONVERTER

Be sure to read this information carefully to make sure you get the most out of your new equipment now and for many years to come.

It's a telescope. It's a precision magnification tool. It's excellent for field observation work like bird-watching or amateur surveying. It's Nikon's first Lensscope Converter and, like all Nikon fine optical products, it's a high quality accurate instrument that will give you years of excellent service. Used with Nikon and Nikon Series E lenses for Nikon SLR cameras, it transforms your lens into a telescope with magnification that's 1/10 the focal length of the lens in use. The image you see at the center of the focusing screen when the lens is attached to a camera is big—approximately 10 millimeters in diameter; details show up sharp and clear. Colors are natural and true to life, because Nikon made sure all chromatic aberrations are corrected. For convenient focusing, the Nikon Lensscope Converter provides a convenient dioptry adjustment ring, with easy adjustments from -5 to +3 diopters.

HOW TO USE THE NIKON LENSSCOPE CONVERTER

Mounting on a Lens

Position the lens in the converter's bayonet mount, aligning the mounting index on the lens with the lens mounting index on the converter. Then, while holding the aperture ring of the lens, twist the lens counter-clockwise until it clicks into place.

To remove: While depressing the lens release button on the converter and holding the aperture ring of the lens, turn the converter clockwise until it comes off.
