The Shaping of Us Lily Bernheimer, 2019-06-29 The spaces we inhabit from homes and workspaces to city streets mediate community creativity and our very identity Using insights from environmental psychology design and architecture The Shaping of Us shows how the built and natural worlds subtly influence our behavior health and personality Exploring ideas such as ruin porn and ninja proof seating mysteries of how we interact with the physical spaces around us are revealed From caves and cathedrals to our current housing crisis and the dreaded open plan office Lily Bernheimer demonstrates that for our well being we must reconnect with the power to shape our spaces Have you ever wondered why we adorn our doorframes with moldings What does Wikipedia's open source technology have to teach us about the history and future of urban housing What does your desk say about your personality From savannahs and skyscrapers to co working spaces The Shaping of Us shows that the built environment supports our well being best when it echoes our natural habitats in some way In attempting to restore this natural quality to human environments we often look to other species for inspiration The real secret to building for well being Bernheimer argues is to reconnect humans with the power to shape our surroundings When people are involved in forming and nurturing their environments they feel a greater sense of agency community and pride or collective efficacy And when communities have high rates of collective efficacy they tend to have less litter vandalism and violent crime Playful and accessible The Shaping of Us is a delightful read for designers professionals and anyone wanting to understand how spaces make us tick and how to fix the broken bits of our world
