

Pristine sound, brute power and no-fault reliability make the HD amps one of the best values on the market today. Massive Toroid power supplies with huge capacitors deliver the bass that kick drums demand. The HD series is designed for 2 ohm operation, to drive up to four 8 ohm speaker systems per channel.

Each HD is hand built at our San Diego factory featuring all steel construction, recessed controls and heavy-duty power components. The rock-solid, efficient design with its superb testimonial-proven sound makes the USA built HD an amp you'll own for years.

PURE—TRANSPARENT SOUND

Carvin considers the sound of an amp to be equally important as its reliability. To insure pure, uncolored sound, we build one of the fastest power stages on the market today. High slew rates of 50V/μs deliver superb transient response. High frequencies are transparent and open - even at extreme levels. Linear feedback circuits reduce distortion to near the theoretical zero limit preventing harshness which would lead to ear fatigue. The HD deliver transparent, unaltered sound—especially important to the studio user. Drive any type of reactive load, including a 70V transformer distribution system.

ULTRA RUGGED FOR TOURING

Every chassis is made from heavy-duty 16 gauge steel that is zinc plated before painting to prevent rust. All internal cabling is neatly tied and harnessed. Every circuit card is double-sided, through-hole plated, FR-4 MIL SPEC fire retardant glass epoxy. "SMT" surface mount technology, featuring precision 1% resistors, prevents components from vibrating loose. Steel output connectors, heavy-duty power switches, recessed knobs, all give the HD amps a "tank-like" ruggedness.

TOROID POWER SUPPLY

Toroids deliver massive amounts of "on demand" current for continuous 2 ohm operation. This gives the power supply a solid foundation, yielding more headroom for large subwoofer applications. Not only do toroids deliver high current, but they are known for reducing stray magnetic fields eliminating hum & noise. This is especially important to the recording industry.

MODULAR CONSTRUCTION

With the HD Series, Carvin brings you totally modular construction. If you ever need an I/O (input/output) connector card because a connector wore-out, just unplug and re-install the replacement card. This applies to every aspect of the HD Series amps including the power supply, power cards, heat sinks and fans. Everything is connected by heavy-duty AMP™ and MOLEX™ type connectors for easy replacement—even the Toroid transformer is a plug-in.

RECEIVING INSPECTION—read before getting started

FRONT PANELS & CONNECTING UP

The HD Series feature front panel signal, peak and protect LEDs to monitor the status of the amp. The recessed Level controls are detented to prevent rotation due to vibration. Balanced TRS & XLR input connectors eliminate hum & noise. Speaker outputs feature heavy-duty binding posts and steel 1/4" jacks.

The rear professional accessory group offers a GROUND switch to remove the chassis ground from the XLR and 1/4" inputs. A PARALLEL input switch connects the inputs together eliminating Y cables for patching multiple amp systems. The accessory group also features a BRIDGE MODE switch to deliver the full power or the amp into a single load or 70V distribution system.
