## **Perfect Maths 2 Target 2011:**

**Department for Children, Schools and Families** Great Britain. National Audit Office, 2008 In 2007 the Department for Children Schools and Families commissioned Sir Peter Williams to undertake an independent review of the quality of primary mathematics teaching and his report was published in June 2008 This report evaluates in particular raising attainment and progress in mathematics and narrowing achievement gaps between certain pupils and their peers and the delivery and effectiveness of the Primary National Strategy's resources and interventions and their impact on pupil and school performance It was found that bringing greater structure and consistency to the way primary mathematics is taught the Strategy initially helped to improve test results at Key Stage 2 Since 2000 however attainment has levelled off It is too early to tell if the 2007 revisions to the Strategy will deliver the step change required The report makes recommendations on this basis

**In the Light of Evolution** National Academy of Sciences, 2014-05-19 Humans possess certain unique mental traits Self reflection as well as ethic and aesthetic values is among them constituting an essential part of what we call the human condition The human mental machinery led our species to have a self awareness but at the same time a sense of justice willing to punish unfair actions even if the consequences of such outrages harm our own interests Also we appreciate searching for novelties listening to music viewing beautiful pictures or living in well designed houses But why is this so What is the meaning of our tendency among other particularities to defend and share values to evaluate the rectitude of our actions and the beauty of our surroundings What brain mechanisms correlate with the human capacity to maintain inner speech or to carry out judgments of value To what extent are they different from other primates equivalent behaviors In the Light of Evolution Volume VII aims to survey what has been learned about the human mental machinery This book is a collection of colloquium papers from the Arthur M Sackler Colloquium The Human Mental Machinery which was sponsored by the National Academy of Sciences on January 11 12 2013 The colloquium brought together leading scientists who have worked on brain and mental traits Their 16 contributions focus the objective of better understanding human brain processes their evolution and their eventual shared mechanisms with other animals The articles are grouped into three primary sections current study of the mind brain relationships the primate evolutionary continuity and the human difference from ethics to aesthetics This book offers fresh perspectives coming from interdisciplinary approaches that open new research fields and constitute the state of the art in some important aspects of the mind brain relationships

*Mathematics Performance in Primary Schools* Great Britain: Parliament: House of Commons: Committee of Public Accounts, 2009 In 2007 08 the National Strategy to improve performance in primary mathematics cost some 104 million to implement The Strategy aims to raise performance through extensive teaching and learning resources supported by professional development programmes for teachers In 2006 07 some 2 3 billion was spent on teaching mathematics in primary schools out of a total expenditure of 10 billion on primary teaching and teaching support staff Yet improvements in the mathematics results of

primary school pupils have levelled off since 2000 In 2008 79 per cent of pupils met the Government's expected standard at Key Stage 2 age 11 This means that over one in five children are starting secondary school without a secure foundation in mathematics There are persistent gaps in the mathematics performance of primary school pupils from different backgrounds and with different characteristics In contrast to other subjects boys are making more progress than girls The biggest attainment gap 18 percentage points is related to deprivation Performance varies across England and between local authorities with the percentage of pupils achieving the expected standard at KS2 ranging from 70 to 87 per cent The Primary National Strategy has contributed to improvements in primary mathematics teaching and learning but weaknesses persist in vital areas such as the use and application of mathematics to real life situations and the assessment of pupils progress The lack of depth in subject knowledge of many primary school teachers and the lack of take up of continuing professional development in mathematics are major concerns which the Department has only recently begun to address through a ten year programme to train 13 000 specialist teachers

*Best-Practice EVA* Bennett Stewart, 2013-02-19 Best Practice EVA tells the new EVA story from the ground up Stewart covers EVA essentials the classic economic profit version of EVA in the first three chapters of the book He shows readers how simple and intuitive EVA really is how it is defined and why it is better than all other measures of corporate profit You discover how it naturally guides managers into making all the right decisions the ones that will truly maximize value You see how to use it in profit sharing bonus plans that create the powerful incentives of an owner Later Stewart introduces new ratios that make EVA much more powerful and much easier to use than ever before The pinnacle of the new ratio framework is EVA Momentum calculated by taking the change in EVA versus the prior period and dividing by the revenues in the prior period It measures the growth rate in EVA scaled to the sales size of the business It is the only corporate performance ratio where bigger always is better because it gets bigger when EVA does which means it should be every company's most important financial goal the one ratio metric that everyone aims to maximize as the key measure of corporate success Stewart then walks through the nuts and bolts of Best Practice EVA kicking off with an in depth look at EVA Margin or EVA as a percent of sales It's a key productivity metric and Stewart's candidate to replace ROI The last link in the Best Practice program is PRVIt the EVA market score report Stewart shows how to read and interpret the report how the score is determined and why investors are turning to it to screen and rate stocks He also shows why it is finding a home with CFOs and IR directors who want insights into how the market is pricing their stock The book concludes with battle tested tips from the firing line practical suggestions for how you can test drive and adopt Best Practice EVA at your company
