Narratives of Academics' Personal Journeys in Contested Spaces Namrata Rao,Anesa Hosein,Ian M.

Kinchin,2023-05-18 Narratives of Academics Personal Journeys in Contested Spaces provides theoretically informed personal narratives of 11 emerging and established leaders in learning and teaching in Australia Finland New Zealand Singapore the UK and the USA The academics narratives focus on how the individuals have navigated to their current leadership role in learning and teaching whilst negotiating contested identities such as gender and physical and social marginalised spaces such as interstitial middle leadership positions These international narratives provide unique perspectives on the sense making of academics as they reflect on their learning and teaching leadership journey and how these journeys are shaped by their contested identities and the marginalised spaces they inhabit Often such identities and spaces are not recognised in higher education which may lead to even more isolating and challenging leadership journeys The book contributes to our understanding of the subjective experiences that academics encounter in their leadership journeys Further the personal narratives included in the book capture how the contested identities and marginalised spaces influence the learning and teaching leadership practices in various educational cultural and national contexts

Resources in Education ,2000-10 Exploring Japanese University English Teachers' Professional Identity Diane

Hawley Nagatomo,2012-01-30 This book contributes to the growing field of EFL teacher identity which is now recognized to influence numerous aspects of classroom teaching and of student learning It focuses on an under researched and yet highly influential group of teachers that shape English language education in Japan Japanese university English teachers In three interrelated narrative studies it examines how four relatively new teachers develop professional identity as they become members of the community of practice of university English teachers how gender impacts the professional identity of seven female professors ranging in age from their early 30s to their 60s and how one teacher s teaching practices and beliefs reflect her personal and professional identity *Racial Battle Fatigue in Higher Education* Kenneth J.

Fasching-Varner,Katrice A. Albert,Roland W. Mitchell,Chaunda Allen,2014-12-23 Racial Battle Fatigue is described as the physical and psychological toll taken due to constant and unceasing discrimination microaggressions and stereotype threat The literature notes that individuals who work in environments with chronic exposure to discrimination and

microaggressions are more likely to suffer from forms of generalized anxiety manifested by both physical and emotional symptoms. This edited volume looks at RBF from the perspectives of graduate students, middle level academics and chief diversity officers at major institutions of learning. RBF takes up William A. Smith's idea and extends it as a means of understanding how the academy or higher education operates. Through microaggressions, stereotype threat, underfunding and defunding of initiatives, offices, expansive commitments to diversity related strategic plans with restrictive power and action and departmental climates of exclusivity and inequity, diversity workers, faculty staff and administration of color along with white allies in like positions find themselves in a badlands where identity difference is used to promote institutional values while at the same time creating unimaginable work spaces for these workers.

Spirituality in Higher Education Heewon Chang, Drick Boyd, 2016-09-16. This collection of articles explores how a wide range of academics, diverse in location, rank and discipline, understand and express how they deal with spirituality in their professional lives and how they integrate spirituality in teaching, research, administration and advising. The contributors also analyze the culture of academia and its challenges to the spiritual development of those involved. Twenty chapter authors from a variety of faith traditions discuss the ways in which their own beliefs have affected their journeys through higher education. By using an autoethnographic self-analytical lens, this collection shows how various spiritualities have influenced how higher education is understood, taught and performed. The book will stimulate debate and conversations on a topic traditionally ignored in academia.

The Racial Crisis in American Higher Education William A. Smith, Philip G. Altbach, Kofi Lomotey, 2012-02-01. Why is it that as we enter the twenty first century the nation's predominantly white colleges and universities continue to be settings where people of color feel unwelcome and marginalized? The contributors to this volume dissect a variety of structural and attitudinal factors that are prevalent in the higher education community, organizational constructs and value orientations which seem to hark more to the past than to the future. They comment on the political, social and economic factors that have shaped academic culture and buttressed its quietly efficient maintenance of racially discriminatory practices. The American system of higher education is often regarded as the best in the world. Smith, Altbach and Lomotey have edited a volume that implicitly asks how much better still it could be if it embraced people of color and provided them with a supportive and nurturing environment, one which encouraged them to reach their fullest creative and intellectual potential. Indeed, this will probably be the most significant challenge that the academy faces in the twenty first century.

Narrative Inquiry into Language Teacher Identity Takaaki Hiratsuka, 2022-03-15. This book provides insights for both native language teachers and local language teachers alike who conduct team taught lessons by revisiting the topic of foreign assistant language teachers (ALTs), the Japan Exchange and Teaching (JET) program and team teaching. This book is innovative in that it is the first to elucidate ALTs' experiences comprehensively across both historical time, i.e. prior to, during and after the JET program, and

social space i.e. inside and outside the school thereby revealing their multiple identities that they come to construct and reconstruct over time and b it explores the meanings and perspectives of particular phenomena that ALTs experience within their specific social settings from their own individual points of view This inquiry does this by using personal narrative accounts gathered from multiple participants Through these narrative accounts Hiratsuka formulates a conceptualization of ALT identity an effort that has hitherto been neglected As a consequence this book offers several practical and empirical applications of the conceptualization to future endeavors involving native language teachers and those who engage with them including the key stakeholders of local language teachers their local boards of education the governments and language learners across the globe
