Computation and Visualization of Geometric Partial Differential Equations Christopher Tiee, 2015-08-09 This is an extended version of my PhD thesis which extends the theory of finite element exterior calculus FEEC to parabolic evolution equations In the extended version I explore some more precise visualizations of the defined quantities as well as explain how the modern theory of functional analysis applies In the main part I extend the theory of approximating evolution equations in Euclidean space using FEEC to hypersurfaces After these main results I describe some possible extensions to nonlinear equations A few appendices detail one of the original motivations for getting into this theory in the first place canonical geometries given as steady state solutions and extremals of certain functionals

Morphisms for Quantitative Spatial Analysis Daniel A. Griffith, Jean H. P. Paelinck, 2018-03-07 This book treats the notion of morphisms in spatial analysis paralleling these concepts in spatial statistics Part I and spatial econometrics Part II The principal concept is morphism e.g. isomorphisms homomorphisms and allomorphisms which is defined as a structure preserving the functional linkage between mathematical properties or operations in spatial statistics and spatial econometrics among other disciplines The purpose of this book is to present selected conceptions in both domains that are structurally the same even though their labelling and

the notation for their elements may differ As the approaches presented here are applied to empirical materials in geography and economics the book will also be of interest to scholars of regional science quantitative geography and the geospatial sciences It is a follow up to the book Non standard Spatial Statistics and Spatial Econometrics by the same authors which was published by Springer in 2011
