Hammond, 1955 **ISC U.S. Atomic Energy Commission**, 1955 **Chemical Kinetics and Inorganic Reaction Mechanisms** Smiljko Asperger, 2011-06-27 The serious study of the reaction mechanisms of transition metal complexes began some five decades ago Work was initiated in the United States and Great Britain the pioneers of that era were in alphabetical order F Basolo R E Connick 1 O Edwards C S Garner G P Haight W C E Higginson E 1 King R G Pearson H Taube M 1 Tobe and R G Wilkins A larger community of research scientists then entered the field many of them students of those just mentioned Interest spread elsewhere as well principally to Asia Canada and Europe Before long the results of individual studies were being consolidated into models many of which traced their origins to the better established field of mechanistic organic chemistry For a time this sufficed but major revisions and new assignments of mechanism became necessary for both ligand substitution and oxidation reduction reactions Mechanistic inorganic chemistry thus took on a shape of its own This process has brought us to the present time Interests have expanded both to include new and more complex species e g metalloproteins and a wealth of new experimental techniques that have developed mechanisms in ever finer detail This is the story the author tells and in so doing he weaves in the identities of the investigators with the story he has to tell This makes an enjoyable as well as informative reading **Surfactant Science and Technology** Drew Myers, 2020-06-23 A solid introduction to the field of surfactant science this new edition provides updated information about surfactant uses structures and preparation as well as seven new
