

Essential Safety Equipment

The short plastic boot on the front seat belt at the outboard anchor location (Regular Cab, driver; Cab Plus, driver and passenger) covers an energy absorbing sew pattern on the seat belt. In the event of an accident, the sew pattern may release and a colored label (REPLACE BELT) may become visible. If this occurs, the seat belt must be replaced.

2-20

WARNING

Inspecting Seat Belts After a Collision:

All seat belt assemblies, including retractors, buckles, front seat buckle support assemblies (slide bar, if so equipped), shoulder belt height adjusters (if equipped), child safety seat tether bracket assemblies (if equipped) and attaching hardware should be inspected after any collision. Mazda recommends that all seat belt assemblies used in vehicles involved in a collision be replaced. However, if the collision was minor and a qualified technician finds

(Continued)

that the belts do not show damage and continue to operate properly, they do not need to be replaced. Seat belt assemblies not in use during a collision should also be inspected and replaced if either damage or improper operation is noted.

WARNING

Replace Belt Label:

If any part of the colored label is exposed, the belt must be replaced. Failure to do so could result in severe personal injuries in a collision.
